Table of Contents

Introduction.....	XIII
Notation and Convention	XVII
Chapter 1. Infinite Galois Theory and Profinite Groups	1
1.1 Inverse Limits	1
1.2 Profinite Groups	2
1.3 Infinite Galois Theory	5
1.4 The p -adic Integers and the Prüfer Group	7
1.5 The Absolute Galois Group of a Finite Field	9
Chapter 2. Algebraic Function Fields of One Variable	12
2.1 Valuations, Places and Valuation Rings	12
2.2 Examples of Discrete Valuations	14
2.3 Extensions of Valuations and Places	14
2.4 Integral Extensions and Dedekind Domains	16
2.5 Function Fields of One Variable	18
2.6 The Riemann-Roch Theorem	19
2.7 Holomorphy Rings	21
2.8 Extensions of the Field of Constants.....	23
2.9 Completions.....	24
Chapter 3. The Riemann Hypothesis for Function Fields	28
3.1 Class Numbers	28
3.2 Zeta Functions	30
3.3 Zeta Functions under Constant Field Extensions	31
3.4 The Functional Equation.....	32
3.5 The Riemann Hypothesis and degree 1 Prime Divisors	34
3.6 Reduction Steps	35
3.7 An Upper Bound	36
3.8 A Lower Bound	39
Chapter 4. Plane Curves	43
4.1 Affine and Projective Plane Curves	43
4.2 Points and Prime Divisors.....	45

4.3	The Genus of a Plane Curve	47
4.4	Points on a Curve over a Finite Field	51
Chapter 5. The Čebotarev Density Theorem		54
5.1	Decomposition Groups	54
5.2	The Artin Symbol over Global Fields	57
5.3	Dirichlet Density	58
5.4	Function Fields	59
5.5	Number Fields	65
Chapter 6. Ultraproducts		74
6.1	First Order Predicate Calculus	74
6.2	Structures	76
6.3	Models	77
6.4	Elementary Substructures	78
6.5	Ultrafilters	79
6.6	Regular Ultrafilters	80
6.7	Ultraproducts	82
6.8	Regular Ultraproducts	85
6.9	Nonprincipal Ultraproducts of Finite Fields	86
Chapter 7. Decision Procedures		88
7.1	Deduction Theory	88
7.2	Gödel's Completeness Theorem	90
7.3	Primitive Recursive Functions	93
7.4	Primitive Recursive Relations	94
7.5	Recursive Functions	95
7.6	Recursive and Primitive Recursive Procedures	97
7.7	A Reduction Step in Decidability Procedures	98
Chapter 8. Algebraically Closed Fields		101
8.1	Elimination of Quantifiers	101
8.2	A Quantifier Elimination Procedure	103
8.3	Effectiveness	105
8.4	Applications	106
Chapter 9. Elements of Algebraic Geometry		109
9.1	Linear Disjointness of Fields	109
9.2	Separable, Regular and Primary Extensions	111
9.3	The Imperfect Degree of a Field	113
9.4	Algebraic Sets	115
9.5	Varieties	117
9.6	Substitutions in Irreducible Polynomials	118
9.7	Rational Maps	119

9.8	Hyperplane Sections	121
9.9	Descent	123
9.10	Projective Varieties	125
Chapter 10.	Pseudo Algebraically Closed Fields	129
10.1	PAC Fields	129
10.2	Reduction to Plane Curves	130
10.3	The PAC Property is an Elementary Statement	132
10.4	PAC Fields of Positive Characteristic	133
10.5	PAC Fields with Valuations	135
10.6	The Absolute Galois Group of a PAC Field	137
Chapter 11.	Hilbertian Fields	141
11.1	Hilbert Sets and Reduction Lemmas	141
11.2	Finitely Generated Extensions of Hilbertian Fields	144
11.3	Separably Hilbertian Fields	147
Chapter 12.	The Classical Hilbertian Fields	150
12.1	Further Reduction	150
12.2	Hilbert Sets and Arithmetic Progressions	152
12.3	Function Fields over Infinite Fields	155
12.4	Infinite Extensions of Hilbertian Fields	156
Chapter 13.	Nonstandard Structures	161
13.1	Higher Order Predicate Calculus	161
13.2	Enlargements	162
13.3	Concurrent Relations	164
13.4	The Existence of Enlargements	165
13.5	Examples	167
Chapter 14.	Nonstandard Approach to Hilbert's Irreducibility Theorem	170
14.1	Criteria for Hilbertianity	170
14.2	Arithmetic Primes versus Functional Primes	172
14.3	Fields with the Product Formula	174
14.4	Generalized Krull Domains	176
Chapter 15.	Profinite Groups and Hilbertian Fields	183
15.1	Finitely Generated Profinite Groups	183
15.2	Abelian Extensions of Hilbertian Fields	184
15.3	Realizing Finite Groups over Hilbertian Fields	185
15.4	The Rank of a Profinite Group	187
15.5	Profinite Completions of Groups and Free Profinite Groups	188
15.6	Subgroups of Free Discrete Groups	191

15.7	Open Subgroups of Free Profinite Groups	196
15.8	An Embedding Property	197
Chapter 16. The Haar Measure		201
16.1	The Haar Measure of a Profinite Group	201
16.2	The Existence of the Haar Measure	203
16.3	Independence	207
16.4	Cartesian Product of Haar Measures	208
16.5	The Haar Measure on the Absolute Galois Group	209
16.6	The PAC Nullstellensatz	211
16.7	The Bottom Theorem	213
16.8	PAC Fields over Uncountable Hilbertian Fields	217
16.9	Stable Fields	222
16.10	Algebraic Groups	225
Chapter 17. Effective Field Theory and Algebraic Geometry		228
17.1	Presented Rings and Fields	228
17.2	Extensions of Presented Fields	231
17.3	Galois Extensions of Presented Fields	235
17.4	The Algebraic and Separable Closures of Presented Fields ...	236
17.5	Constructive Algebraic Geometry	237
17.6	Presented Rings and Constructible Sets	242
17.7	Basic and Normal Stratification	245
Chapter 18. The Elementary Theory of e -free PAC Fields		248
18.1	\aleph_1 -saturated PAC Fields	248
18.2	The Elementary Equivalence Theorem for \aleph_1 -saturated PAC Fields	249
18.3	Elementary Equivalence for PAC Fields	252
18.4	On e -free PAC Fields	255
18.5	The Elementary Theory of Perfect e -free PAC Fields	257
18.6	The Probable Truth of a Sentence	258
18.7	Change of Base Field	260
18.8	The Fields $K_s(\sigma)$	262
18.9	The Transfer Theorem	262
18.10	The Elementary Theory of Finite Fields	264
Chapter 19. Examples and Applications		268
19.1	The Decomposition-Intersection Procedure	268
19.2	C_i -Fields and Weakly C_i -Fields	269
19.3	Perfect PAC Fields which are C_i	273
19.4	The Existential Theory of PAC Fields	275
19.5	Kronecker Classes of Number Fields	276
19.6	Davenport's Problem	279

Chapter 20. Projective Groups and Frattini Covers	286
20.1 The Frattini Group of a Profinite Group	286
20.2 Cartesian Squares	287
20.3 On \mathcal{C} -Projective Groups	289
20.4 Projective Groups	292
20.5 Countably Generated Projective Groups	296
20.6 Frattini Covers	299
20.7 The Universal Frattini Cover	300
20.8 Projective Pro- p -Groups	303
20.9 Supernatural Numbers	304
20.10 The Sylow Theorems	306
20.11 On Complements of Normal Subgroups	307
Chapter 21. Perfect PAC Fields of Bounded Corank	314
21.1 Classes of Perfect PAC Fields of Bounded Corank	314
21.2 Basic Elementary Statements	315
21.3 Reduction Steps	319
21.4 Application of Ultraproducts	322
Chapter 22. Undecidability	326
22.1 Turing Machines	326
22.2 The Computation of Functions by Turing Machines	327
22.3 Recursive Inseparability of Sets of Turing Machines	331
22.4 The Predicate Calculus	333
22.5 Undecidability in the Theory of Graphs	336
22.6 Assigning Graphs to Profinite Groups	341
22.7 The Graph Conditions	342
22.8 Assigning Profinite Groups to Graphs	345
22.9 Assigning Fields to Graphs	347
22.10 Interpretation of the Theory of Graphs in the Theory of Fields	348
Chapter 23. Frobenius Fields	352
23.1 The Field Crossing Argument	352
23.2 The Embedding Property and Universal Frattini Covers	355
23.3 The Smallest Embedding Cover of a Finite Group	358
23.4 A Decision Procedure	361
23.5 Examples	363
Chapter 24. On ω -free PAC Fields	368
24.1 Characterization of Free Profinite Groups via Embedding Problems – Part 1	368
24.2 Groups whose Open Subgroups all have the Embedding Property	369
24.3 Free Closed Normal Subgroups of Free Profinite Groups	371
24.4 Characterization of Free Profinite Groups via Embedding Problems – Part 2	375

24.5	Model Companions	381
24.6	The Model Companion in an Augmented Theory of Fields ..	385
24.7	Model Completions and New Hilbertian Fields	391
24.8	Cyclic Extensions in Positive Characteristic	393
24.9	An Embedding Problem	394
24.10	Solvable Extensions of Hilbertian Fields	397
Chapter 25. Galois Stratification		403
25.1	The Artin Symbol	403
25.2	Conjugacy Domains under Projection	405
25.3	Elimination of One Variable	410
25.4	The Complete Elimination Procedure	412
25.5	Model-Theoretic Applications	414
25.6	A Limit of Theories	417
Chapter 26. Galois Stratification over Finite Fields		422
26.1	The Elementary Theory of Frobenius Fields	422
26.2	The Elementary Theory of Finite Fields	427
26.3	Near Rationality of the Zeta Function of a Galois Formula	430
26.4	Zeta Functions over p -adic Fields	438
Open Problems		442
References		445
Index		452
