Preface to the First Edition	7
Preface to the Revised Edition	11

### PART ONE: *Beginnings*

1. The Colonial Setting	25
1. Lord Bacon—2. Emigration to New England— 3. Character of New England—4. Geography— 5. Agriculture—6. Manufacture—7. Mercantilism —8. Craftsmen—9. Shipbuilding—10. Urban centers—11. Interest in science—12. Royal So- ciety—13. John Winthrop—14. British influence on science—15. Religion and science—16. Medi- cal study—17. Summary	

### PART TWO: *The Federalist Period*

2. The Revolutionary Years	67
1. Poor economic condition—2. Scientific interest —3. John Adams and the American Academy— 4. Cutler and the White Mountains—5. The Mas- sachusetts Medical Society—6. Bushnell—7. Jef- fries—8. Count Rumford	
3. The Practical Navigators	93
1. Colonial shipping—2. Beginning of American navy and early naval architects—3. Shipbuilding in the early republic—4. Science in the coastal towns—5. Newburyport—6. Salem—7. Bowditch and his <i>Practical Navigator</i> —8. Bowditch's other scientific work—9. Boston—10. Bond—11. Nan- tucket—12. Providence, Almanacks—13. Mans- field—14. The Stonington skippers	

4. Turnpike and Towpath 135  
 1. Lack of industrialization—2. British technical improvements—3. American turnpikes—4. Their construction—5. Wooden bridges—6. Iron bridges—7. The earliest canals—8. Middlesex Canal—9. The later canals—10. Steam navigation—11. Loammi Baldwin
5. The Beginnings of Mass Production 175  
 1. Tool and machine—2. Early inventions—3. Yankee peddlers—4. Whitney and the cotton gin—5. Whitney and interchangeable parts—6. North, Colt, Blanchard—7. Slater and the beginning of textile industry—8. The Waltham system and Lowell—9. Clockmaking
6. Lecture Hall and Textbook 201  
 1. Early textbooks—2. Federalism—3. Waterhouse—4. Chemistry and geology—5. Silliman at Yale—6. Medicine, botany and chemistry at Harvard—7. Bigelow's botany, Dana's geology, Cleveland—8. Farrar and mathematics—9. Bowditch and his Laplace translation—10. Western Massachusetts
- PART THREE: The Jacksonian Period*
7. The Surveys 237  
 1. The struggle for emancipation—2. The earliest surveys—3. Hitchcock—4. The 1837 surveys—5. Binney, Jackson—6. Percival—7. Borden—8. The Wilkes expedition—9. The origin of the A.A.S.—10. The new type of scientist
8. Humanists and Humanitarians 261  
 1. Eaton—2. The new democracy—3. The role of New England—4. The Lyceums—5. School reform—6. The Lowell Institute, Lyell's visit—7. Emerson, Channing—8. The socialists, Thoreau

- 9. The physicians—10. The dentists—11. Anesthesia—12. Jarvis, Shattuck—13. Statistics—14. The public health report

9. Steam, Water, Electricity 303  
 1. Early steam engine—2. Allen—3. Canals versus Railroads—4. Early West Point engineering—5. Major Whistler—6. Lowell as a center of engineering—7. Francis—8. Boston water supply—9. Corliss—10. Electricity
10. The Great Naturalists 335  
 1. Growing interest in natural history—2. Nuttall—3. Rafinesque—4. Audubon—5. Lyell—6. Young Agassiz—7. Agassiz's first American years—8. His later work—9. Agassiz as a teacher—10. Young Gray—11. Gray at Harvard—12. Young J. D. Dana—13. Dana's textbooks—14. Other naturalists
11. Science and Religion 375  
 1. The setting in New England—2. Silliman and theology—3. Hitchcock and theology—4. The beginnings of Darwinism—5. Gray on Darwin—6. Agassiz on Darwin—7. Wyman, Bowen—8. Dana on Darwin
12. Sky and Ocean 399  
 1. Clipper ships—2. Steamboats—3. Boston as the growing center—4. Sumner—5. Plans for astronomical observatories—6. The Harvard Observatory—7. The *Nautical Almanac*—8. Peirce—9. Lovering, Gould
13. The Scientific Schools 421  
 1. Scientific education in 1845—2. Primitive laboratories—3. Science in 1845—4. Liebig's influence—5. The Sheffield School—6. The Lawrence School—7. Rogers—8. The foundation of M.I.T.—9. The Morrill Act—10. The Civil War
