

# Generalized notions of continued fractions : ergodicity and number theoretic applications

Juan Fernandez Sanchez, ... [et al.]

9781032516783

1. Generalized Lehner Continued Fractions.
2.  $\alpha$ -modified Farey Series.
3. Ergodic Aspects of the Generalized Lehner Continued Fractions.
4. The  $\alpha$ -simple Continued Fraction.
5. The Generalized Khintchine Constant.
6. The Entropy of the System  $([0; 1]; \beta; \mu_a; T_a)$ .
7. The Natural Extension of  $([0; 1]; \beta; \mu_a; T_a)$ .
8. The Dynamical System  $([0; 1]; \beta; \nu_a; Q_a)$ .
9. Generalized Hirzebruch-Jung Continued Fractions.
10. The Entropy of  $([0; 1]; \beta; \nu_a; H_a)$ .
11. The Natural Extension of  $([0; 1]; \beta; \nu_a; H_a)$ .
12. A New Generalization of the Farey Series.
