An Arithmetic Riemann-Roch Theorem for Singular Arithmetic Surfaces

Wayne Aitken

March 1996 • Volume 120 • Number 573 (first of 4 numbers) • ISSN 0065-9266

American Mathematical Society
Providence, Rhode Island

Contents

Introduction	vii
Chapter 1. The Intersection Pairing for One-Dimensional Schemes	1
1. Preliminaries	2
2. The Determinant of Cohomology Functor	4
3. The Norm Functor for Zero-Dimensional Schemes	16
4. The Definition of the Intersection Pairing	20
5. The Intersection Pairing and Norms	28
6. The Norm Functor for Divisors	32
7. Other Properties of the Intersection Pairing	38
8. Extensions of the Base Field	44
Chapter 2. The Intersection Pairing for Families of One-dimensional Schemes	47
1. Introduction	47
2. Horizontal Divisors	48
3. The Norm Functor	51
4. The Intersection Pairing	56
5. The Determinant of Cohomology Line Bundle	62
6. Flat Base Change	78
Chapter 3. The Riemann-Roch Isomorphism	80
1. The Relative Dualizing Sheaf	80
2. The Adjunction Formula	86
3. The Duality Isomorphism on Determinants	94
4. The Riemann-Roch Isomorphism	99
Chapter 4. Intersection Functions on Complex Curves	101
1. Motivation: The Non-Archimedean Situation	101
2. The Archimedean Case: Basic Definitions	109
3. Intersection Functions on Nonsingular Curves	115
4. Intersection Functions on Singular Curves: The Existence Theorem	123
5. Classification of Intersection Functions: Preliminaries	128
6. Classification of Intersection Functions	137
7. Chern Forms of Intersection Functions	144
8. Chern Forms of Intersection Functions: Proofs	147
9. Chern Forms of Intersection Functions: Another Interpretation	153
Chapter 5. The Arithmetic Riemann-Roch Isomorphism	161
1. Norms for Determinants of Cohomology	161
2. The Riemann-Roch Isomorphism for Arithmetic Surfaces	171
Bibliography	174
