Contents

Preface	xi
Chapter 1 Foundational Material	1
1.1 Vector Space	1
1.1.1 The General Linear Group	1
1.1.2 Vectors and Tensors	3
1.2 Differentiable Manifolds	5
1.2.1 The Tangent Space, the Frame Bundle, and Tensor Fields	5
1.2.2 Mappings of Differentiable Manifolds	7
1.2.3 Exterior Algebra, Pfaffian Forms, and the Cartan Lemma	9
1.2.4 The Structure Equations of the General Linear Group	12
1.2.5 The Frobenius Theorem	12
1.2.6 The Cartan Test	13
1.2.7 The Structure Equations of a Differentiable Manifold	15
1.2.8 Affine Connections on a Differentiable Manifold	18
1.3 Projective Space	19
1.3.1 Projective Transformations, Projective Frames, and the Structure Equations of a Projective Space	19
1.3.2 The Duality Principle	22
1.3.3 Projectivization	24
1.3.4 Classical Homogeneous Spaces (Affine, Euclidean, Non-Euclidean) and Their Transformations	25
1.4 Specializations of Moving Frames	28
1.4.1 The First Specialization	28
1.4.2 Power Series Expansion of an Equation of a Curve ...	30
1.4.3 The Osculating Conic to a Curve	32
1.4.4 The Second and Third Specializations and Their Geometric Meaning	33
1.4.5 The Osculating Cubic to a Curve	35

1.4.6	Two More Specializations and Their Geometric Meaning	37
1.4.7	Conclusions	39
1.5	Some Algebraic Manifolds	41
1.5.1	Grassmannians	41
1.5.2	Determinant Submanifolds	44
	Notes	46
Chapter 2 Varieties in Projective Spaces and Their Gauss Maps		49
2.1	Varieties in a Projective Space	49
2.1.1	Equations of a Variety	49
2.1.2	The Bundle of First-Order Frames Associated with a Variety	51
2.1.3	The Prolongation of Basic Equations	53
2.2	The Second Fundamental Tensor and the Second Fundamental Form	54
2.2.1	The Second Fundamental Tensor, the Second Fundamental Form, and the Osculating Subspace of a Variety	54
2.2.2	Further Specialization of Moving Frames and Reduced Normal Subspaces	56
2.2.3	Asymptotic Lines and Asymptotic Cone	58
2.2.4	The Osculating Subspace, the Second Fundamental Form, and the Asymptotic Cone of the Grassmannian	59
2.2.5	Varieties with One-Dimensional Normal Subspaces ...	61
2.3	Rank and Defect of Varieties with Degenerate Gauss Maps	63
2.4	Examples of Varieties with Degenerate Gauss Maps	65
2.5	Application of the Duality Principle	70
2.5.1	Dual Variety	70
2.5.2	The Main Theorem	72
2.5.3	Cubic Symmetroid	76
2.5.4	Singular Points of the Cubic Symmetroid	78
2.5.5	Correlative Transformations	80
2.6	Hypersurface with a Degenerate Gauss Map Associated with a Veronese Variety	81
2.6.1	Veronese Varieties and Varieties with Degenerate Gauss Maps	81
2.6.2	Singular Points	85
	Notes	86

Chapter 3	Basic Equations of Varieties with Degenerate Gauss Maps	91
3.1	The Monge–Ampère Foliation	91
3.1.1	The Monge–Ampère Foliation Associated with a Variety with a Degenerate Gauss Map	91
3.1.2	Basic Equations of Varieties with Degenerate Gauss Maps	92
3.1.3	The Structure of Leaves of the Monge–Ampère Foliation	95
3.1.4	The Generalized Griffiths–Harris Theorem	96
3.2	Focal Images	99
3.2.1	The Focus Hypersurfaces	99
3.2.2	The Focus Hypercones	101
3.2.3	Examples	102
3.2.4	The Case $n = 2$	103
3.2.5	The Case $n = 3$	104
3.3	Some Algebraic Hypersurfaces with Degenerate Gauss Maps in P^4	105
3.4	The Sacksteder–Bourgain Hypersurface	116
3.4.1	The Sacksteder Hypersurface	116
3.4.2	The Bourgain Hypersurface	118
3.4.3	Local Equivalence of Sacksteder’s and Bourgain’s Hypersurfaces	123
3.4.4	Computation of the Matrices C_i and B^α for Sacksteder–Bourgain Hypersurfaces	125
3.5	Complete Varieties with Degenerate Gauss Maps in Real Projective and Non-Euclidean Spaces	126
3.5.1	Parabolic Varieties	126
3.5.2	Examples	128
	Notes	132
Chapter 4	Main Structure Theorems	135
4.1	Torsal Varieties	135
4.2	Hypersurfaces with Degenerate Gauss Maps	141
4.2.1	Sufficient Condition for a Variety with a Degenerate Gauss Map to be a Hypersurface in a Subspace of P^N	141
4.2.2	Focal Images of a Hypersurface with a Degenerate Gauss Map	144
4.2.3	Examples of Hypersurfaces with Degenerate Gauss Maps	145

4.3	Cones and Affine Analogue of the Hartman–Nirenberg Cylinder Theorem	146
	4.3.1 Structure of Focus Hypersurfaces of Cones	146
	4.3.2 Affine Analogue of the Hartman–Nirenberg Cylinder Theorem	149
4.4	Varieties with Degenerate Gauss Maps with Multiple Foci and Twisted Cones	151
	4.4.1 Basic Equations of a Hypersurface of Rank r with r -Multiple Focus Hyperplanes	151
	4.4.2 Hypersurfaces with Degenerate Gauss Maps of Rank r with a One-Dimensional Monge–Ampère Foliation and r -Multiple Foci	152
	4.4.3 Hypersurfaces with Degenerate Gauss Maps with Double Foci on Their Rectilinear Generators in the Space P^4	154
	4.4.4 The Case $n = 3$ (Continuation)	164
4.5	Reducible Varieties with Degenerate Gauss Maps	165
	4.5.1 Some Definitions	165
	4.5.2 The Structure of Focal Images of Reducible Varieties with Degenerate Gauss Maps	165
	4.5.3 The Structure Theorems for Reducible Varieties with Degenerate Gauss Maps	166
4.6	Embedding Theorems for Varieties with Degenerate Gauss Maps	169
	4.6.1 The Embedding Theorem	169
	4.6.2 A Sufficient Condition for a Variety with a Degenerate Gauss Map to be a Cone	172
	Notes	172
Chapter 5 Further Examples and Applications of the Theory of Varieties with Degenerate Gauss Maps		175
5.1	Lightlike Hypersurfaces in the de Sitter Space and Their Focal Properties	176
	5.1.1 Lightlike Hypersurfaces and Physics	176
	5.1.2 The de Sitter Space	177
	5.1.3 Lightlike Hypersurfaces in the de Sitter Space	181
	5.1.4 Singular Points of Lightlike Hypersurfaces in the de Sitter Space	184
	5.1.5 Lightlike Hypersurfaces of Reduced Rank in the de Sitter Space	192

5.2	Induced Connections on Submanifolds	195
5.2.1	Congruences and Pseudocongruences in a Projective Space	195
5.2.2	Normalized Varieties in a Multidimensional Projective Space	198
5.2.3	Normalization of Varieties of Affine and Euclidean Spaces	203
5.3	Varieties with Degenerate Gauss Maps Associated with Smooth Lines on Projective Planes over Two-Dimensional Algebras	207
5.3.1	Two-Dimensional Algebras and Their Representations	207
5.3.2	The Projective Planes over the Algebras \mathbb{C} , \mathbb{C}^1 , \mathbb{C}^0 , and \mathbb{M}	208
5.3.3	Equation of a Straight Line	209
5.3.4	Moving Frames in Projective Planes over Algebras ...	210
5.3.5	Focal Properties of the Congruences K , K^1 , and K^0	211
5.3.6	Smooth Lines in Projective Planes	214
5.3.7	Singular Points of Varieties Corresponding to Smooth Lines in the Projective Spaces over Two-Dimensional Algebras	215
5.3.8	Curvature of Smooth Lines over Algebras	217
	Notes	218
	Bibliography	221
	Symbols Frequently Used	237
	Author Index	239
	Subject Index	241
