D. Senato
(Eds)

Algebraic Combinatorics and Computer Science

A Tribute to Gian-Carlo Rota

Springer

Contents

INTRODUCTION

Ten abandoned gold mines	3
<i>H. Crapo</i>	

THE FUBINI LECTURES

Foreword	25
<i>E. Vesentini</i>	
The adventures of measure theory	27
<i>G.-C. Rota</i>	
What is invariant theory, really?	41
<i>G.-C. Rota</i>	
Twelve problems in probability no one likes to bring up	57
<i>G.-C. Rota</i>	

RECURRENT THEMES OF GIAN-CARLO ROTA'S MATHEMATICAL THOUGHT

Resolution of Weyl modules: the Rota touch	97
<i>D. A. Buchsbaum</i>	
Circulant recursive matrices	111
<i>M. Barnabei, L. B. Montefusco</i>	
Remarks on Invariant geometric calculus. Cayley–Grassmann algebras and geometric Clifford algebras	129
<i>P. Bravi, A. Brini</i>	
Grassmann geometric calculus, invariant theory and superalgebras	151
<i>A. Brini, F. Regonati, A. G. B. Teolis</i>	
Rota–Metropolis cubic logic and Ulam–Rényi games	197
<i>F. Cicalese, D. Mundici, U. Vaccaro</i>	
Umbral nature of the Poisson random variables	245
<i>E. Di Nardo, D. Senato</i>	
A formal theory of resultants (I): an algorithm in invariant theory	267
<i>G.-C. Rota, J. A. Stein</i>	

A formal theory of resultants (II): a constructive definition of the resultant	315
<i>G.-C. Rota, J. A. Stein</i>	

FOCUS ON CATALAN NUMBERS AND COMBINATORICS ON WORDS

Foreword to the surveys by Aigner and Perrin	345
<i>M. Barnabei, F. Bonetti</i>	
Catalan and other numbers: a recurrent theme	347
<i>Martin Aigner</i>	
Enumerative combinatorics on words	391
<i>D. Perrin</i>	

ALGEBRAIC COMBINATORICS AND THEORETICAL COMPUTER SCIENCE

Alphabet splitting	431
<i>A. Lascoux</i>	
Some operations on the family of equivalence relations	445
<i>T. Britz, M. Mainetti, L. Pezzoli</i>	
Solving linear recurrences using functionals	461
<i>A. Di Bucchianico, G. Soto y Koelemeijer</i>	
Polynomiality of the q, t-Kostka revisited	473
<i>A. M. Garsia, M. Zabrocki</i>	
A combinatorial approach to the theory of PI-algebras and exponential growth	493
<i>A. Giambruno</i>	
On the permanent of certain circulant matrices	513
<i>B. Codenotti, G. Resta</i>	
Episturmian words and morphisms (results and conjectures)	533
<i>J. Justin</i>	
A curious characteristic property of standard Sturmian words	541
<i>G. Pirillo</i>
