Contents

Forward	v
1. The Arrow–Debreu Model	1
1.1 Preferences and utility functions	2
1.2 Maximal elements	25
1.3 Demand functions	33
1.4 Exchange economies	40
1.5 Optimality in exchange economies	47
1.6 Optimality and decentralization	54
1.7 Production economies	65
2. Riesz Spaces of Commodities and Prices	81
2.1 Partially ordered vector spaces	86
2.2 Positive linear functionals	93
2.3 Topological Riesz spaces	100
2.4 Banach lattices	107

3. Markets With Infinitely Many Commodities . . .	115
3.1 The economic models	115
3.2 Proper and myopic preferences	116
3.3 Edgeworth equilibria and the core	126
3.4 Walrasian equilibria and quasiequilibria	132
3.5 Pareto optimality	145
3.6 Examples of exchange economies	154
 4. Production With Infinitely Many Commodities . . .	 167
4.1 The model of a production economy	167
4.2 Edgeworth equilibria and the core	172
4.3 Walrasian equilibria and quasiequilibria	178
4.4 Approximate supportability	184
4.5 Properness and the welfare theorems	189
 5. The Overlapping Generations Model	 197
5.1 The setting of the OLG model	202
5.2 The OLG commodity-price duality	209
5.3 Malinvaud optimality	214
5.4 Existence of competitive equilibria	223
 Bibliography	 243
 Index	 245
