

Products of Groups

Bernhard Amberg, Silvana Franciosi, and Francesco de Giovanni

9780198535751

Table of Contents

1. Elementary Properties of Factorized Groups

- 1: The factorizer
- 2: Normalizers, indices, and chain conditions
- 3: Sylow subgroups
- 4: Existence of factorizations

2. Products of Nilpotent Groups

- 5: Products of abelian groups
- 6: Products of central-by-finite groups
- 7: Residually finite products of abelian-by-finite groups
- 8: The theorem of Kegel and Wielandt
- 9: The structure of a finite product of nilpotent groups

3. Products of Periodic Groups

- 10: An example of a non-periodic product of two periodic groups
- 11: Soluble products of periodic groups
- 12: Soluble products of groups of finite exponent

4. Products of Groups of Finite Rank

- 13: Rank formulae
- 14: The number of generators of a finite soluble group
- 15: Factorized groups with finite Prüfer rank
- 16: Soluble products of polycyclic groups
- 17: Products of a nilpotent and polycyclic group
- 18: Soluble products of groups of finite rank

5. Splitting and Conjugacy Theorems

- 19: Cohomology of groups
- 20: Cohomological machinery
- 21: Splitting and conjugacy
- 22: Near splitting and near conjugacy

6. Triply Factorized Groups

- 23: Examples of groups with an abelian triple factorization
- 24: Lower central factors and tensor products
- 25: Groups with a nilpotent triple factorization
- 26: FC-nilpotent and FC-hypercentral groups
- 27: Groups with a supersoluble triple factorization

28: Trifactorized groups

7. Some Further Topics

29: The 'inside-outside' problem

30: The fitting length of a soluble product of nilpotent groups

31: Products of an abelian and an FC-group

32: Products of locally cyclic groups

33: Subnormal subgroups of factorized groups

34: Groups factorized by finitely many subgroups

35: Bibliography
