Library of Congress Cataloging-in-Publication Data
Curtain, Ruth F.

An introduction to infinite-dimensional linear systems theory/
Ruth F. Curtain and Hans Zwart.

p. cm. — (Texts in applied mathematics ; 21)

Includes bibliographical references and index.

ISBN-13: 978-1-4612-8702-5

1. System analysis. 2. Linear systems. 3. Control theory.

I. Zwart, H.J. (Hans) II. Title. III. Series.

Contents

Series Preface	vi
Preface	vii
List of Figures	xvii
1 Introduction	1
1.1 Motivation	1
1.2 Systems theory concepts in finite dimensions	4
1.3 Aims of this book	10
2 Semigroup Theory	13
2.1 Strongly continuous semigroups	13
2.2 Contraction and dual semigroups	32
2.3 Riesz-spectral operators	37
2.4 Delay equations	53
2.5 Invariant subspaces	68
2.6 Exercises	80
2.7 Notes and references	99
3 The Cauchy Problem	101
3.1 The abstract Cauchy problem	101
3.2 Perturbations and composite systems	109
3.3 Boundary control systems	121
3.4 Exercises	129

3.5	Notes and references	139
4	Inputs and Outputs	141
4.1	Controllability and observability	141
4.2	Tests for approximate controllability and observability	162
4.3	Input-output maps	175
4.4	Exercises	191
4.5	Notes and references	213
5	Stability, Stabilizability, and Detectability	215
5.1	Exponential stability	215
5.2	Exponential stabilizability and detectability	227
5.3	Compensator design	246
5.4	Exercises	251
5.5	Notes and references	267
6	Linear Quadratic Optimal Control	269
6.1	The problem on a finite-time interval	269
6.2	The problem on the infinite-time interval	292
6.3	Exercises	303
6.4	Notes and references	333
7	Frequency-Domain Descriptions	335
7.1	The Callier-Desoer class of scalar transfer functions	335
7.2	The multivariable extension	349
7.3	State-space interpretations	363
7.4	Exercises	373
7.5	Notes and references	385
8	Hankel Operators and the Nehari Problem	387
8.1	Frequency-domain formulation	387
8.2	Hankel operators in the time domain	396
8.3	The Nehari extension problem for state linear systems	412
8.4	Exercises	437
8.5	Notes and references	455
9	Robust Finite-Dimensional Controller Synthesis	457
9.1	Closed-loop stability and coprime factorizations	457
9.2	Robust stabilization of uncertain systems	470
9.3	Robust stabilization under additive uncertainty	479
9.4	Robust stabilization under normalized left-coprime-factor uncertainty	501
9.5	Robustness in the presence of small delays	532
9.6	Exercises	538
9.7	Notes and references	561

A. Mathematical Background	565
A.1 Complex analysis	565
A.2 Normed linear spaces	571
A.2.1 General theory	571
A.2.2 Hilbert spaces	576
A.3 Operators on normed linear spaces	581
A.3.1 General theory	581
A.3.2 Operators on Hilbert spaces	598
A.4 Spectral theory	608
A.4.1 General spectral theory	608
A.4.2 Spectral theory for compact normal operators	615
A.5 Integration and differentiation theory	621
A.5.1 Integration theory	621
A.5.2 Differentiation theory	629
A.6 Frequency-domain spaces	635
A.6.1 Laplace and Fourier transforms	635
A.6.2 Frequency-domain spaces	639
A.6.3 The Hardy spaces	643
A.7 Algebraic concepts	649
A.7.1 General definitions	649
A.7.2 Coprime factorizations over principal ideal domains	654
A.7.3 Coprime factorizations over commutative integral domains	660
A.7.4 The convolution algebras $\mathcal{A}(\beta)$	661
References	669
Notation	685
Index	689
