Introduction	vii
1 Convexity in Real Projective Space	
1.1 Convexity in real affine space	1
1.2 Real projective space	2
1.3 Convexity in real projective space	5
2 Complex Convexity	
2.1 Linearly convex sets	15
2.2 \mathbb{C} -convexity: Definition and examples	25
2.3 \mathbb{C} -convexity: Duality and invariance	33
2.4 Open \mathbb{C} -convex sets	39
2.5 Boundary properties of \mathbb{C} -convex sets	45
2.6 Spirally connected sets	63
3 Analytic Functionals and the Fantappiè Transformation	
3.1 The basic pairing in affine space	74
3.2 The basic pairing in projective space	83
3.3 Analytic functionals in affine space	93
3.4 Analytic functionals in projective space	101
3.5 The Fantappiè transformation	107
3.6 Decomposition into partial fractions	115
3.7 Complex Kergin interpolation	120
4 Analytic Solutions to Partial Differential Equations	
4.1 Solvability in \mathbb{C} -convex sets	129
4.2 Solvability and P -convexity for carriers	140
