

Lecture Notes in Mathematics

A collection of informal reports and seminars

Edited by A. Dold, Heidelberg and B. Eckmann, Zürich

61

M. André, D. A. Buchsbaum,
E. Dubuc, R. L. Knighten,
F. W. Lawvere

Reports of the
Midwest Category Seminar II

Edited by S. MacLane, University of Chicago

1968

Springer-Verlag Berlin · Heidelberg · New York

Table of Contents

M. André, On the vanishing of the second cohomology group of a commutative algebra.....	1
David A. Buchsbaum, Homology and universality relative to a functor.....	28
F. William Lawvere, Some algebraic problems in the context of functorial semantics of algebraic theories.....	41
R. L. Knighten, An application of categories of fractions to homotopy theory.....	62
Eduardo Dubuc, Adjoint triangles.....	69
