

David Bachman

A Geometric Approach
to Differential Forms

Birkhäuser
Boston • Basel • Berlin

David Bachman
Pitzer College
Department of Mathematics
Claremont, CA 91711
U.S.A.

Cover design by Mary Burgess.

Mathematics Subject Classification (2000): Primary: 58A10; Secondary: 26B12, 26B20

Library of Congress Control Number: 2006930548

ISBN-10: 0-8176-4499-7
ISBN-13: 978-0-8176-4499-4

eISBN: 0-8176-4520-9

Printed on acid-free paper.

Contents

Preface	xi
Guide to the Reader	xv
1 Multivariable Calculus	1
1.1 Vectors	1
1.2 Functions of multiple variables	4
1.3 Multiple integrals	6
1.4 Partial derivatives	10
1.5 Gradients	12
2 Parameterizations	17
2.1 Parameterized curves in \mathbb{R}^2	17
2.2 Cylindrical and spherical coordinates	18
2.3 Parameterized surfaces in \mathbb{R}^3	21
2.4 Parameterized curves in \mathbb{R}^3	23
2.5 Parameterized regions in \mathbb{R}^2 and \mathbb{R}^3	24
3 Introduction to Forms	27
3.1 So what <i>is</i> a differential form?	27
3.2 Generalizing the integral	28
3.3 Interlude: a review of single variable integration	29
3.4 What went wrong?	29
3.5 What about surfaces?	31
4 Forms	33
4.1 Coordinates for vectors	33
4.2 1-forms	35
4.3 Multiplying 1-forms	37
4.4 2-forms on $T_p\mathbb{R}^3$ (optional)	42

4.5	2-forms and 3-forms on $T_p\mathbb{R}^4$ (optional)	44
4.6	n -forms	45
4.7	Algebraic computation of products	47
5	Differential Forms	49
5.1	Families of forms	49
5.2	Integrating differential 2-forms	51
5.3	Orientations	58
5.4	Integrating 1-forms on \mathbb{R}^m	61
5.5	Integrating n -forms on \mathbb{R}^m	63
5.6	The change of variables formula	64
5.6.1	1-forms on \mathbb{R}^1	64
5.6.2	2-forms on \mathbb{R}^2	65
5.6.3	3-forms on \mathbb{R}^3	69
5.7	Summary: How to integrate a differential form	70
5.7.1	The steps	70
5.7.2	Integrating 2-forms	71
5.7.3	A sample 2-form	72
6	Differentiation of Forms	75
6.1	The derivative of a differential 1-form	75
6.2	Derivatives of n -forms	77
6.3	Interlude: 0-forms	78
6.4	Algebraic computation of derivatives	80
6.5	Antiderivatives	81
7	Stokes' Theorem	83
7.1	Cells and chains	83
7.2	The generalized Stokes' Theorem	86
7.3	Vector calculus and the many faces of the generalized Stokes' Theorem	91
8	Applications	99
8.1	Maxwell's equations	99
8.2	Foliations and contact structures	100
8.3	How <i>not</i> to visualize a differential 1-form	104
9	Manifolds	107
9.1	Pull-backs	107
9.2	Forms on subsets of \mathbb{R}^n	109
9.3	Forms on parameterized subsets	110
9.4	Forms on quotients of \mathbb{R}^n (optional)	111
9.5	Defining manifolds	113
9.6	Differential forms on manifolds	114

9.7 Application: DeRham cohomology 116

A Non-linear forms 119

 A.1 Surface area 119

 A.2 Arc length 121
