CONTENTS

Preface	v
CHAPTER I. PRELIMINARY NOTES AND AUXILIARY ASSERTIONS	1
§ 1. Introduction	1
§ 2. General Characteristics of the Impulsive Differential Equations	6
§ 3. Integral Inequalities for Piecewise Continuous Functions	11
CHAPTER II. REGULARLY PERTURBED IMPULSIVE DIFFERENTIAL EQUATIONS	17
§ 4. Averaging of Impulsive Differential Equations of Standard Type	19
§ 5. Partially Additive Averaging for Impulsive Differential Equations of Standard Type	28
§ 6. Partially Multiplicative Averaging for Impulsive Systems of Differential Equations of Standard Type	32
§ 7. Periodic and Almost Periodic Solutions of Regularly Perturbed Impulsive Systems	37
7.1. Existence of periodic solutions	37
7.2. Almost periodic solutions	42
§ 8. Periodic Solutions of Impulsive Systems with Delay Viewed as a Small Parameter	48
§ 9. Existence of Integral Sets (Manifolds) and Behaviour of the Solutions on Them	62
9.1. Integral sets of impulsive systems with hyperbolic linear parts	62

9.2. Methods of the integral manifolds	82
Notes and Comments	95
CHAPTER III. SINGULARLY PERTURBED DIFFERENTIAL EQUATIONS	97
§ 10. Initial Value Problem for a Nonlinear Singularly Perturbed System of Impulsive Differential Equations	117
10.1. Noncritical case	118
10.2. Critical case	134
§ 11. Two-Point Boundary Value Problem for Singularly Perturbed Impulsive Systems	152
§ 12. Two-Point Boundary Value Problem for Singularly Perturbed Impulsive Systems with Singular Boundary Conditions	170
§ 13. Periodic Problem for Singularly Perturbed Impulsive Systems	183
13.1. Linear systems	183
13.2. Nonlinear systems	200
13.3. Numerical-analytical method	215
13.4. Almost periodic solutions of singularly perturbed linear systems of impulsive differential equations	228
§ 14. Dirichlet Problem for a Second Order Quasilinear Singularly Perturbed Impulsive Differential Equation	235
§ 15. Justification of the Averaging Method for a System of Singularly Perturbed Differential Equations with Impulses	242
Notes and Comments	262
References	263
