

Contents

Preface	vii
Introduction	ix
1. Fractal Sets and Measures	
<i>Andrzej Lasota, Józef Myjak and Tomasz Szarek</i>	
Markov Operators and Semifractals	3
<i>Jacques Lévy Véhel and Claude Tricot</i>	
On Various Multifractal Spectra	23
<i>Zhi-Ying Wen</i>	
One-Dimensional Moran Sets and the Spectrum of Schrödinger Operators	43
2. Fractals and Dynamical Systems	
<i>Albert M. Fisher</i>	
Small-scale Structure via Flows	59
<i>Károly Simon</i>	
Hausdorff Dimension of Hyperbolic Attractors in \mathbb{R}^3	79
<i>Bernd O. Stratmann</i>	
The Exponent of Convergence of Kleinian Groups; on a Theorem of Bishop and Jones	93
<i>Amiran Ambroladze and Jörg Schmeling</i>	
Lyapunov Exponents Are not Rigid with Respect to Arithmetic Subsequences	109
3. Stochastic Processes and Random fractals	
<i>Ai Hua Fan</i>	
Some Topics in the Theory of Multiplicative Chaos	119
<i>Peter Mörters</i>	
Intersection Exponents and the Multifractal Spectrum for Measures on Brownian Paths	135
<i>Davar Khoshnevisan and Yimin Xiao</i>	
Additive Lévy Processes: Capacity and Hausdorff Dimension	151

4. Fractal Analysis in Euclidean Space*Hans Triebel*

The Fractal Laplacian and Multifractal Quantities 173

Jenny Harrison

Geometric Representations of Currents and Distributions 193

Maria Agostina Vivaldi

Variational Principles and Transmission Conditions for Fractal Layers 205

5. Harmonic Analysis on Fractals*Takashi Kumagai*

Function Spaces and Stochastic Processes on Fractals 221

*Alf Jonsson*A Dirichlet Form on the Sierpinski Gasket,
Related Function Spaces, and Traces 235*Alexander Teplyaev*

Spectral Zeta Function of Symmetric Fractals 245
