

## CONTENTS

<b>SEDOV, L. I.</b> On acceleration of gravitational force in Minkowski space	1
<b>GERMAIN, P.</b> Some recent contributions to mechanics of material continua	5
<b>JACOB [IACOB], C.</b> On gas jets with a prescribed compressibility law	7
<b>SHCHELKACHEV, V. N.</b> Special features of mathematical solutions of problems connected with the investigation of one-dimensional flows in multidimensional spaces	21
<b>STRUMINSKIĬ, V. V.</b> A new method of solving the system of kinetic equations for gas mixtures	31
<b>STEPANOV, G. YU.</b> Models of an inviscid fluid in the theory of detached flows	35
<b>CHERNYĬ, G. G.</b> The mechanism of anomalously low resistance to the motion of bodies in solid media	45
<b>SAL'NIKOV [SALJNIKOV], V. N. and GRYGLASZEWSKI, P.</b> The natural flow of a "power" non-Newtonian fluid on a vertical heated plate	53
<b>LIDOV, M. L.</b> Estimation of the parameters of motion under the action of nonmodelable accelerations	67
<b>LADIKOV-ROEV, YU. P.</b> The existence and motion of magneto-vortex rings in the atmosphere	73
<b>KOROBĖNIKOV, V. P., MARKOV, V. V., SEDOV, L. I., and MEN'SHOV, I. S.</b> On the nonhomogeneity of density fields behind a shock wave propagating through a dust-gas mixture	81
<b>TIRSKIĬ, G. A.</b> Models not of Navier-Stokes type in problems of super- and hypersonic flow about bodies by a viscous gas	85
<b>GONOR, A. L.</b> Analytic solution of a nonlinear problem of entry of a thin cone into a fluid	99
<b>GRIGORYAN, S. S.</b> On the structure and dynamics of the universe	107
<b>BELYAEV, YU. N. and YAVORSKAYA, I. M.</b> Problems of stability and the beginning of chaos in closed hydrodynamic flows	123
<b>REGIRER, S. A.</b> Continuum models of the motion of a collection of living organisms	135
<b>RYZHOV, O. S.</b> Boundary value problems of the asymptotic theory of hydrodynamic stability	143
<b>KULIKOVSKIĬ, A. G.</b> Peculiarities of the behavior of nonlinear quasitransverse waves in an elastic medium with a small anisotropy	153

<b>GOGOSOV, V. V., SIMONOVSKIĬ, A. YA., and SHAPOSHNIKOVA, G. A.</b> Hydrodynamics of magnetic fluids. Some models and examples of their applications .....	161
<b>SHIKIN, I. S.</b> Magneto hydrodynamics of a magnetized plasma .....	173
<b>BARMIN, A. A. and USPENSKIĬ, V. S.</b> Peculiarities of MHD flows connected with the switching-off of the electrical conductivity of a medium .....	181
<b>EGLIT, M. E.</b> The dynamics of snow avalanches .....	187
<b>VATAZHIN, A. B.</b> Electrohydrodynamic turbulent flows .....	195
<b>VASETSKAYA, N. G.</b> On the motion of a polymer molecule in a fluid ..	205
<b>TERENT'EV, A. G.</b> Nonstationary motion of bodies in a fluid .....	211
<b>SEMENOVA, I. P. and YAKUBENKO, A. E.</b> The evolution of solitary perturbations on the surface of a film of viscous fluid running down a vertical wall .....	223
<b>GEORGIEVSKIĬ, P. YU. and LEVIN, V. A.</b> Supersonic flow over a body with a heat supply ahead of it .....	229
<b>ESMAIL, M. N. and MARKOV, V. V.</b> Numerical simulation of dynamic contact angles .....	235
<b>VASIL'EVA, N. L., SEDOVA, G. L., FILIPPOV, A. V., and CHERNYĬ, L. T.</b> Electrohydrodynamic models of charging aerosol particles in the atmosphere .....	241
<b>HSIEH, R. K. T.</b> Defects in coupled elastic materials and their induced multipole characterizations .....	247
<b>IL'ICHEV, A. T.</b> On properties of a nonlinear evolution equation of fifth order describing wave processes in media with weak dispersion ....	255
<b>TSYPKIN, A. G.</b> On the energy-momentum tensor of matter in the special theory of relativity .....	261
