

# CONTENTS

|   |     |
|---|-----|
| Preface . . . . .                                     | vii |
| Chapter I. PROBABILITY                                |     |
| 1. Preliminaries . . . . .                            | 1   |
| 2. Brownian motion . . . . .                          | 8   |
| 3. Markov properties . . . . .                        | 15  |
| 4. Martingales . . . . .                              | 28  |
| 5. Stochastic integrals . . . . .                     | 42  |
| 6. Stochastic calculus . . . . .                      | 54  |
| 7. Weak convergence . . . . .                         | 71  |
| 8. Exercises and further results . . . . .            | 76  |
| Notes . . . . .                                       | 81  |
| Chapter II. POTENTIAL THEORY                          |     |
| 1. The Dirichlet problem . . . . .                    | 83  |
| 2. Choquet capacities . . . . .                       | 97  |
| 3. Newtonian potentials and Green functions . . . . . | 103 |
| 4. Transition densities . . . . .                     | 121 |
| 5. Newtonian capacity . . . . .                       | 135 |
| 6. Excessive functions . . . . .                      | 147 |
| 7. Martin boundary . . . . .                          | 155 |
| 8. Exercises and further results . . . . .            | 169 |
| Notes . . . . .                                       | 174 |

Chapter III. LIPSCHITZ DOMAINS

|  |     |
|--|-----|
| 1. The boundary Harnack principle . . . . .            | 176 |
| 2. The Martin boundary for Lipschitz domains . . . . . | 192 |
| 3. The conditional lifetime problem . . . . .          | 198 |
| 4. Fatou theorems . . . . .                            | 207 |
| 5. Support of harmonic measure . . . . .               | 213 |
| 6. Exercises and further results . . . . .             | 225 |
| Notes . . . . .  | 228 |

Chapter IV. SINGULAR INTEGRALS

|  |     |
|--|-----|
| 1. Maximal functions . . . . .                                   | 230 |
| 2. Hilbert transforms . . . . .                                  | 237 |
| 3. Riesz transforms . . . . .                                    | 242 |
| 4. Littlewood-Paley functions . . . . .                          | 259 |
| 5. Singular integral operators and Fourier multipliers . . . . . | 267 |
| 6. The space $H^1$ . . . . .                                     | 278 |
| 7. Bounded mean oscillation . . . . .                            | 288 |
| 8. Exercises and further results . . . . .                       | 306 |
| Notes . . . . .  | 309 |

Chapter V. ANALYTIC FUNCTIONS

|  |     |
|--|-----|
| 1. Conformal invariance . . . . .                    | 310 |
| 2. Range of analytic functions . . . . .             | 320 |
| 3. Boundary behavior of analytic functions . . . . . | 326 |
| 4. Harmonic measure . . . . .                        | 337 |
| 5. The angular derivative problem . . . . .          | 348 |
| 6. The corona problem . . . . .                      | 361 |
| 7. Exercises and further results . . . . .           | 371 |
| Notes . . . . .                                      | 373 |

|                        |     |
|------------------------|-----|
