Contents

List of Symbols and Abbreviations xi

Preface xvii

1 The Cardiovascular System under an Ergometric Workload 1
- 1.1 Some Physiological Facts . . . 1
- 1.2 The Basic Model . . . 6
- 1.3 Analysis of the Basic Model . . . 16
  - 1.3.1 Existence of equilibria . . . 18
  - 1.3.2 An invariance property of Grodins' system . . . 21
- 1.4 The Linear-Quadratic Regulator Problem . . . 22
- 1.5 The Bicycle Ergometer Test . . . 25
- 1.6 Parameter Identification . . . 27
  - 1.6.1 A priori determined parameters . . . 28
  - 1.6.2 The output least-squares formulation of the parameter identification problem . . . 30
- 1.7 Numerical Results . . . 33
  - 1.7.1 Parameter identification . . . 33
  - 1.7.2 Gradient computations . . . 34
  - 1.7.3 Sensitivity analysis . . . 37

2 Respiratory Modeling 45
- 2.1 Respiratory Control Physiology . . . 46
  - 2.1.1 General features of respiration . . . 46
  - 2.1.2 The chemical control system for ventilation . . . 47
  - 2.1.3 Structural features of ventilation . . . 51
  - 2.1.4 Blood gas transport . . . 53
  - 2.1.5 Respiratory control stresses and problems . . . 57
  - 2.1.6 Approaches to modeling respiratory control . . . 58
- 2.2 Respiratory Control Model . . . 59
  - 2.2.1 The lung compartment . . . 60
  - 2.2.2 The tissue compartment . . . 62
  - 2.2.3 The brain compartment . . . 62
  - 2.2.4 Dissociation relations . . . 63

2.2.5 State delays . . . 63
2.2.6 Empirical control equation . . . 64
2.2.7 Minute ventilation and tidal volume . . . 65
2.2.8 Cardiac output and CBF . . . 66
2.3 Stability of Respiratory Control . . . 66
2.3.1 Computation of the delays . . . 66
2.3.2 Stability and delays . . . 68
2.4 Modeling Applications . . . 78
2.4.1 Sleep and PB . . . 78
2.4.2 PB and high altitude . . . 83
2.4.3 Respiratory complications of HF . . . 91
2.4.4 Other modeling issues . . . 94

3 Cardiorespiratory Modeling 105
3.1 Physiology Introduction . . . 105
3.1.1 Global control of the CVS . . . 106
3.1.2 Local control of the CVS and autoregulation . . . 114
3.1.3 Blood volume shift . . . 118
3.1.4 Interaction of CVS and RS control . . . 119
3.2 The Combined Model . . . 125
3.2.1 Model equations . . . 125
3.2.2 State dependency of the delays . . . 128
3.2.3 Control formulation . . . 129
3.2.4 Steady-state relations . . . 130
3.3 Modeling Applications . . . 135
3.3.1 CHF . . . 135
3.3.2 Orthostatic and LBNP stress . . . 141
3.3.3 Blood volume control and hemorrhage . . . 151
3.3.4 CBF and OID . . . 154

4 Blood Volume and the Venous System 165
4.1 Introduction . . . 165
4.2 Scaling . . . 166
4.2.1 Isometric relationships . . . 166
4.2.2 Allometric relationships . . . 167
4.2.3 Cardiovascular entities . . . 168
4.3 The Venous System . . . 169
4.4 Capacitance . . . 171
4.4.1 Passive mechanisms . . . 171
4.4.2 Active mechanisms . . . 174
4.4.3 Flow effects . . . 174
4.4.4 Modeling and measurement . . . 177
4.4.5 System of compliances . . . 178
4.4.6 Mean circulatory filling pressure . . . 178
4.4.7 Parallel arrangement . . . 179
4.5 Blood Volume . . . 180

4.5.1 Characteristic times . . . 181
4.5.2 RBC . . . 182
4.5.3 Plasma . . . 183
4.5.4 Microvascular filtration . . . 183
4.5.5 Volume regulation . . . 183
4.5.6 Volume measurement . . . 187
4.5.7 RBC distribution . . . 188
4.5.8 Hemoconcentration . . . 188
4.6 Hemodialysis . . . 190
4.6.1 Ultrafiltration . . . 191
4.6.2 Vascular refilling . . . 191
4.6.3 Ultrafiltration control . . . 195
4.6.4 Blood pressure control . . . 197
4.6.5 Time-variant system . . . 197
4.6.6 Ultrafiltration pulses . . . 198
4.6.7 Blood volume sequestration . . . 198
4.6.8 Blood volume sensitivity . . . 200

5 Future Directions **201**
5.1 Introduction . . . 201
5.2 Physiological Questions . . . 202
5.3 Mathematical and Modeling Issues . . . 206
5.4 Clinical Applications . . . 208

A Supplemental Calculations **213**
A.1 Equilibrium Computation for the CVS if P_{as} Is Given . . . 213
A.2 The Jacobian of $\mathcal{F}(x, p, W, 0)$ with Respect to x . . . 214
A.3 Sensitivity with Respect to a Variable . . . 216
A.4 Generalized Sensitivity Functions . . . 217

B A Nonlinear Feedback Law **223**
B.1 The Relative Degree of a System . . . 223
B.2 A Nonlinear Coordinate Transform . . . 224
B.3 Construction of the Feedback Law . . . 227
B.4 The Nonlinear Feedback Law for the Cardiovascular Model . . . 227

C Retarded Functional Differential Equations: Basic Theory **231**
C.1 Basic Notions . . . 231
C.2 Linear Equations and the Linear-Quadratic Regulator Problem . . . 234
C.3 Eigenvalues and Local Stability . . . 237

Bibliography **241**

Index **265**
