Beer, Gerald Alan.

Topologies on closed and closed convex sets / by Gerald Beer.

p. cm. -- Mathematics and its applications ; 2681

Includes index.

[ISBN 0-7923-2531-1 (alk. paper)]

1. Topology. 2. Hyperspace. 3. Metric spaces. 4. Normed linear spaces. I. Title. II. Series. Mathematics and its applications (Kluwer Academic Publishers) ; 268.

QA611.B38 1993

514'.32--dc20

# Table of Contents

<i>Preface</i>	ix
<b>Chapter 1. Preliminaries</b>	<b>1</b>
Section 1.1 Notation and Background Material	1
Section 1.2 Weak Topologies	8
Section 1.3 Semicontinuous Functions	13
Section 1.4 Convex Sets and the Separation Theorem	20
Section 1.5 Gap and Excess	28
<b>Chapter 2. Weak Topologies Determined by Distance Functionals</b>	<b>34</b>
Section 2.1 The Wijsman Topology	34
Section 2.2 Hit-and-Miss Topologies and the Wijsman Topology	43
Section 2.3 UC Spaces	54
Section 2.4 The Slice Topology	60
Section 2.5 Complete Metrizability of the Wijsman and Slice Topologies	69
<b>Chapter 3. The Attouch-Wets and Hausdorff Metric Topologies</b>	<b>78</b>
Section 3.1 The Attouch-Wets Topology	78
Section 3.2 The Hausdorff Metric topology	85
Section 3.3 Varying the Metrics	92
Section 3.4 Set Convergence and Strong Convergence of Linear Functionals	100
<b>Chapter 4. Gap and Excess Functionals and Weak Topologies</b>	<b>101</b>
Section 4.1 Families of Gap and Excess Functionals	106
Section 4.2 Presentations of the Attouch-Wets and Hausdorff Metric Topologies	113
Section 4.3 The Scalar Topology and the Linear Topology for Convex Sets	121
Section 4.4 Weak Topologies determined by Infimal Value Functionals	128

<b>Chapter 5. The Fell Topology and Kuratowski-Painlevé Convergence</b>	<b>138</b>
Section 5.1 The Fell Topology	138
Section 5.2 Kuratowski-Painlevé Convergence	145
Section 5.3 Epi-convergence	155
Section 5.4 Mosco Convergence and the Mosco Topology	170
Section 5.5 Mosco Convergence versus Wijsman Convergence	178
<b>Chapter 6. Multifunctions : The Rudiments</b>	<b>183</b>
Section 6.1 Multifunctions	184
Section 6.2 Lower and Upper Semicontinuity for Multifunctions	192
Section 6.3 Outer Semicontinuity versus Upper Semicontinuity	199
Section 6.4 KKM Maps and their Application	208
Section 6.5 Measurable Multifunctions	216
Section 6.6 Two Selection Theorems	228
<b>Chapter 7. The Attouch-Wets Topology for Convex Functions</b>	<b>235</b>
Section 7.1 Attouch-Wets Convergence of Epigraphs	235
Section 7.2 Continuity of Polarity and the Attouch-Wets Topology	241
Section 7.3 Regularization of Convex Functions and Attouch-Wets Convergence	250
Section 7.4 The Sum Theorem	256
Section 7.5 Convex Optimization and the Attouch-Wets Topology	264
<b>Chapter 8. The Slice Topology for Convex Functions</b>	<b>270</b>
Section 8.1 Slice and Dual Slice Convergence of Convex Functions	270
Section 8.2 Convex Duality and the Slice Topology	276
Section 8.3 Subdifferentials of Convex Functions and the Slice Topology	287
Section 8.4 Stability of the Geometric Ekeland Principle	299
<b>Notes and References</b>	<b>306</b>
<b>Bibliography</b>	<b>315</b>
<b>Symbols and Notation</b>	<b>331</b>
<b>Subject Index</b>	<b>335</b>
