# CONTENTS

**Preface** . . . . . **v**

## **Lecture 1 by L. Arlotti and N. Bellomo**

### **On the Cauchy Problem for the Boltzmann Equation**

1	The Nonlinear Boltzmann Equation . . . . .	1
2	On the Initial Value Problem in the Absence of External Force Field . . . . .	4
2.1	The Cauchy Problem for Small Initial Data . . . . .	7
2.2	The Cauchy Problem for Large Initial Data . . . . .	18
2.3	The Cauchy Problem Near Equilibrium . . . . .	31
3	On the Generalized Boltzmann Equation . . . . .	34
4	Open Problems . . . . .	42
4.1	On the Cauchy Problem with External Force Field . . . . .	42
4.2	On the Cauchy Problem Related to Wave Phenomena . . . . .	44
4.3	On the Cauchy Problem Related to Hydrodynamics . . . . .	46
4.4	On the Cauchy Problem for the Discrete Boltzmann equation . . . . .	47
4.5	On the Cauchy Problem for Nonlinear Continuous Models . . . . .	50
5	Final Remarks . . . . .	52
	References . . . . .	54

## Lecture 2 by M. Lachowicz

### Asymptotic Analysis of Nonlinear Kinetic Equations: The Hydrodynamic Limit

1	Introduction . . . . .	65
2	Kinetic and Hydrodynamic Equations . . . . .	67
2.1	Kinetic Equations . . . . .	67
2.2	Dimension Analysis . . . . .	74
2.3	Hydrodynamic Equations . . . . .	76
2.4	Notations . . . . .	79
2.5	Basic Estimates . . . . .	84
3.	Compressible Dynamics . . . . .	86
3.1	Singularly Perturbed Boltzmann Equation . . . . .	86
3.2	Hilbert Procedure . . . . .	88
3.3	Modified Hilbert Expansion . . . . .	92
3.4	Initial Layer Expansion . . . . .	95
3.5	Equation for the Remainder . . . . .	98
3.6	Hydrodynamic Limit for the Boltzmann Equation . . . . .	105
3.7	Hydrodynamic Limit for the Enskog Equation for $a \ll \varepsilon$ . . . . .	106
3.8	Hydrodynamic Limit for the Enskog Equation for $a \sim \varepsilon$ . . . . .	116
3.9	Hydrodynamic Limit for the Povzner Equation . . . . .	120
3.10	SDE Approximating Solutions of the Hydrodynamic Equations . . . . .	121
4.	Incompressible Dynamics . . . . .	130
4.1	Level of Smooth Solutions . . . . .	130
4.2	Level of Weak Solutions . . . . .	133
	References . . . . .	137

**Lecture 3 by J. Polewczak**

**An Introduction to Kinetic Theory of Dense Gases**

1 Introduction . . . . .	149
2 The Revised Enskog Equation . . . . .	151
3 The Square-Well Kinetic Equation . . . . .	160
References . . . . .	176

**Lecture 4 by W. Waluś**

**Computational Methods for the Boltzmann Equation**

1 Introduction . . . . .	179
2 The Splitting Method in Kinetic Theory . . . . .	184
3 Numerical Schemes for the Boltzmann Equation . . . . .	188
4 Numerical Evaluation of the Collision Operator . . . . .	194
5 Correction Techniques . . . . .	205
6 Other Methods . . . . .	206
References . . . . .	213

**General Bibliography**

Books and Lecture Notes – Kinetic Theory . . . . .	225
Books and Lecture Notes – Fluid Dynamics . . . . .	226

Books and Lecture Notes – Mathematical Methods . . .	227
Review Papers . . . . .	228
Research Papers – Cauchy Problem . . . . .	230
Research Papers – Derivation of Kinetic Equations . . .	234
Research Papers – Discrete Boltzmann Equation . . .	234
Research Papers – Enskog Equation . . . . .	237
Research Papers – Hydrodynamics and Asymptotic Methods . . . . .	238
Research Papers – Mathematical Methods . . . . .	242
Research Papers – Nonlinear Models . . . . .	243
Research Papers – Numerical Schemes . . . . .	244
Research Papers – Problems with Boundaries . . . . .	253
Research Papers – Wave Solutions . . . . .	255
