

Series on Advances in Mathematics for Applied Sciences – Vol. 51

LECTURE NOTES ON THE MATHEMATICAL THEORY OF GENERALIZED BOLTZMANN MODELS

Nicola Bellomo

Dipartimento di Matematica, Politecnico di Torino, Italy

Mauro Lo Schiavo

Dipartimento Metodi e Modelli per le Applicazioni
Università Roma, Italy

Published by

World Scientific Publishing Co. Pte. Ltd.

UK office: 57 Shelton Street, Covent Garden, London WC2H 9HE

Library of Congress Cataloging-in-Publication Data

Bellomo, N.

Lecture notes on the mathematical theory of generalized Boltzmann models / Nicola Bellomo, Mauro Lo Schiavo.

p. cm. -- (Series on advances in mathematics for applied sciences ; vol. 51)

Includes bibliographical references.

ISBN 9810240783 (alk. paper)

1. Maxwell-Boltzmann distribution law. 2. Kinetic theory of matter -- Mathematical models. I. Schiavo, Mauro Lo. II. Title. III. Title: Mathematical theory of generalized Boltzmann models. IV. Series.

Contents

Preface	xi
Chapter 1. Generalized Kinetic Models	1
1.1 Introduction	1
1.2 Generalized Kinetic Models	3
1.3 Generalized Models and Plan of the Book	11
1.4 Aim of the Book	16
1.5 References	17
Chapter 2. Mathematical Background: Measure, Integration, Topology	21
2.1 Introduction	21
2.2 Tools from Measure Theory	22
2.2.1 Physical connections	23
2.2.2 Basics on measure theory	25
2.2.3 Measures on the real line	30

2.2.4	Measures on \mathbb{R}^n	35
2.3	Tools from Integration Theory	40
2.3.1	Lebesgue integrals	40
2.3.2	Main theorems of integration theory	42
2.3.3	Distribution functionals	49
2.3.4	Some notable generalizations . . .	56
2.3.5	Two conclusive examples	61
2.4	Tools from Topology	68
2.4.1	Basics on topologies	68
2.4.2	Function spaces	74
2.4.3	The linear spaces case	79
2.5	References	84

Chapter 3.	Models of Population Dynamics with Stochastic Interactions	87
3.1	Introduction	87
3.2	The Generalized Jager and Segel Model .	89
3.3	On the Initial Value Problem	93
3.4	Stationary Points	97
3.5	Applications and Perspectives	100
3.5.1	Modelling η and ψ	100
3.5.2	A model of social behaviors	103
3.5.3	A model in epidemiology	106
3.5.4	Perspectives	108
3.6	References	110

Chapter 4. Generalized Kinetic Models for Coagulation and Fragmentation . . . 113

- 4.1 Introduction 113
- 4.2 Description of the Models 116
- 4.3 Mathematical Problems 120
 - 4.3.1 Existence of solutions 121
 - 4.3.2 Equilibrium solutions and stability 126
- 4.4 Critical Analysis and Perspectives . . . 131
- 4.5 References 134

Chapter 5. Kinetic Cellular Models in the Immune System Competition 137

- 5.1 Kinetic Models Towards Immunology . . 137
- 5.2 Scaling in Kinetic Cellular Models . . . 140
- 5.3 Phenomenological System and Modelling 144
- 5.4 Kinetic Evolution Equations 149
- 5.5 Qualitative Analysis, Applications, and Perspectives 158
 - 5.5.1 Qualitative analysis 159
 - 5.5.2 Simulation problems 161
 - 5.5.3 Perspectives 165
- 5.6 References 167

Chapter 6. Kinetic Models for the Evolution of Antigens Generalized Shape	171
6.1 An Introduction to the Generalized Shape	171
6.2 The Mathematical Model	173
6.3 On the Initial Value Problem	177
6.4 Applications and Developments	183
6.5 References	186
Chapter 7. The Boltzmann Model	189
7.1 Introduction	189
7.2 The Nonlinear Boltzmann Equation	195
7.3 Mathematical Problems	199
7.4 Analytic Treatment	205
7.4.1 The Cauchy problem for small initial data	206
7.4.2 The Cauchy problem for large initial data	211
7.4.3 The initial-boundary value problem	216
7.4.4 Open problems	216
7.4.5 Evolution problems in the presence of a force field	218
7.4.6 Shock waves	219
7.4.7 Asymptotic analysis	219
7.5 Computational Methods	220
7.6 References	224

Chapter 8. Generalized Kinetic Models for Traffic Flow	235
8.1 Introduction	235
8.2 Traffic Flow and Hydrodynamics	236
8.2.1 Scalar hydrodynamic models	240
8.2.2 Vector hydrodynamic models	243
8.3 Kinetic Traffic Flow Models	246
8.3.1 From Prigogine's to Paveri Fontana's modelling	249
8.3.2. Developments in kinetic modelling	254
8.3.3 Evolution problems	262
8.4 Perspectives	265
8.5 References	268
Chapter 9. Dissipative Kinetic Models for Disparate Mixtures	273
9.1 Introduction	273
9.2 Dissipative Collision Dynamics	275
9.2.1 Cluster conservative collisions	276
9.2.2 Cluster destructive collisions	278
9.3 Kinetic Equations for Mixtures of Clusters	282
9.4 Mixtures with Continuous Mass Distribution	286
9.5 Mathematical Problems	288

9.6	Perspectives in Modelling	289
9.7	References	290
Chapter 10.	Research Perspectives	293
10.1	Introduction	293
10.2	Discrete Generalized Models	295
10.2.1	The discrete Boltzmann equation	297
10.2.2	Discrete models in immunology .	302
10.3	Looking for a General Structure	315
10.4	Development of New Models	323
10.5	Closure	325
10.6	References	326
Books and Review Papers	329
