

Sterling K. Berberian

# A First Course in Real Analysis

With 19 Illustrations

Springer

# Contents

Preface . . . . .	vii
-------------------	-----

## CHAPTER 1

Axioms for the Field $\mathbb{R}$ of Real Numbers . . . . .	1
§1.1. The field axioms . . . . .	1
§1.2. The order axioms . . . . .	4
§1.3. Bounded sets, LUB and GLB . . . . .	8
§1.4. The completeness axiom (existence of LUB's) . . . . .	11

## CHAPTER 2

First Properties of $\mathbb{R}$ . . . . .	15
§2.1. Dual of the completeness axiom (existence of GLB's) . . . . .	15
§2.2. Archimedean property . . . . .	16
§2.3. Bracket function . . . . .	19
§2.4. Density of the rationals . . . . .	20
§2.5. Monotone sequences . . . . .	21
§2.6. Theorem on nested intervals . . . . .	23
§2.7. Dedekind cut property . . . . .	26
§2.8. Square roots . . . . .	28
§2.9. Absolute value . . . . .	30

## CHAPTER 3

Sequences of Real Numbers, Convergence . . . . .	33
§3.1. Bounded sequences . . . . .	33
§3.2. Ultimately, frequently . . . . .	35
§3.3. Null sequences . . . . .	36
§3.4. Convergent sequences . . . . .	39
§3.5. Subsequences, Weierstrass-Bolzano theorem . . . . .	43
§3.6. Cauchy's criterion for convergence . . . . .	48
§3.7. limsup and liminf of a bounded sequence . . . . .	50

Sterling K. Berberian  
Department of Mathematics  
The University of Texas at Austin  
Austin, TX 78712  
USA

*Editorial Board*

S. Axler  
Department of  
Mathematics  
San Francisco State University  
San Francisco, CA 94132  
USA

F.W. Gehring  
Department of  
Mathematics  
University of Michigan  
Ann Arbor, MI 48109  
USA

K.A. Ribet  
Department of  
Mathematics  
University of California  
at Berkeley  
Berkeley, CA 94720-3840  
USA

*On the cover:* Formula for the fundamental theorem of calculus.

Library of Congress Cataloging-in-Publication Data  
Berberian, Sterling K., 1926-

A first course in real analysis/Sterling K. Berberian

p. cm. — (Undergraduate texts in mathematics)

Includes bibliographical references (p. — ) and index.

ISBN 978-1-4612-6433-0 ISBN 978-1-4419-8548-4 (eBook)

DOI 10.1007/978-1-4419-8548-4

1. Mathematical analysis. 2. Numbers, Real. I. Title.

II. Series.

QA300.B457 1994

515—dc20

93-46020

Printed on acid-free paper.

## CHAPTER 4

Special Subsets of $\mathbb{R}$ . . . . .	56
§4.1. Intervals . . . . .	56
§4.2. Closed sets . . . . .	61
§4.3. Open sets, neighborhoods . . . . .	65
§4.4. Finite and infinite sets . . . . .	71
§4.5. Heine-Borel covering theorem . . . . .	75

## CHAPTER 5

Continuity . . . . .	80
§5.1. Functions, direct images, inverse images . . . . .	80
§5.2. Continuity at a point . . . . .	84
§5.3. Algebra of continuity . . . . .	88
§5.4. Continuous functions . . . . .	90
§5.5. One-sided continuity . . . . .	92
§5.6. Composition . . . . .	96

## CHAPTER 6

Continuous Functions on an Interval . . . . .	98
§6.1. Intermediate value theorem . . . . .	98
§6.2. $n$ 'th roots . . . . .	100
§6.3. Continuous functions on a closed interval . . . . .	101
§6.4. Monotonic continuous functions . . . . .	103
§6.5. Inverse function theorem . . . . .	105
§6.6. Uniform continuity . . . . .	106

## CHAPTER 7

Limits of Functions . . . . .	110
§7.1. Deleted neighborhoods . . . . .	110
§7.2. Limits . . . . .	112
§7.3. Limits and continuity . . . . .	115
§7.4. $\epsilon, \delta$ characterization of limits . . . . .	117
§7.5. Algebra of limits . . . . .	118

## CHAPTER 8

Derivatives . . . . .	121
§8.1. Differentiability . . . . .	121
§8.2. Algebra of derivatives . . . . .	124
§8.3. Composition (Chain Rule) . . . . .	126
§8.4. Local max and min . . . . .	128
§8.5. Mean value theorem . . . . .	129

CHAPTER 9

Riemann Integral . . . . . 135

§9.1. Upper and lower integrals: the machinery . . . . . 135

§9.2. First properties of upper and lower integrals . . . . . 142

§9.3. Indefinite upper and lower integrals . . . . . 145

§9.4. Riemann-integrable functions . . . . . 149

§9.5. An application: log and exp . . . . . 154

§9.6. Piecewise pleasant functions . . . . . 161

§9.7. Darboux’s theorem . . . . . 167

§9.8. The integral as a limit of Riemann sums . . . . . 174

CHAPTER 10

Infinite Series . . . . . 179

§10.1. Infinite series: convergence, divergence . . . . . 179

§10.2. Algebra of convergence . . . . . 183

§10.3. Positive-term series . . . . . 184

§10.4. Absolute convergence . . . . . 189

CHAPTER 11

Beyond the Riemann Integral . . . . . 194

§11.1. Negligible sets . . . . . 196

§11.2. Absolutely continuous functions . . . . . 203

§11.3. The uniqueness theorem . . . . . 208

§11.4. Lebesgue’s criterion for Riemann-integrability . . . . . 211

§11.5. Lebesgue-integrable functions . . . . . 215

Appendix . . . . . 220

§A.1. Proofs, logical shorthand . . . . . 220

§A.2. Set notations . . . . . 222

§A.3. Functions . . . . . 224

§A.4. Integers . . . . . 226

Index of Notations . . . . . 231

Index . . . . . 233
