Betts, John T. 1943-

Practical methods for optimal control using nonlinear programming / John T. Betts.

p. cm.— (Advances in design and control)

Includes bibliographical references and index.

ISBN 0-89871-488-5

1. Control theory. 2. Mathematical optimization. 3. Nonlinear programming. I. Series.

QA402.3 .B47 2001

Contents

Preface	ix
1 Introduction to Nonlinear Programming	1
1.1 Preliminaries	1
1.2 Newton's Method in One Variable	2
1.3 Secant Method in One Variable	3
1.4 Newton's Method for Minimization in One Variable	5
1.5 Newton's Method in Several Variables	7
1.6 Unconstrained Optimization	8
1.7 Recursive Updates	10
1.8 Equality-Constrained Optimization	12
1.9 Inequality-Constrained Optimization	15
1.10 Quadratic Programming	17
1.11 Globalization Strategies	20
1.12 Nonlinear Programming	27
1.13 An SQP Algorithm	28
1.14 What Can Go Wrong	30
2 Large, Sparse Nonlinear Programming	37
2.1 Overview: Large, Sparse NLP Issues	37
2.2 Sparse Finite Differences	38
2.3 Sparse QP Subproblem	40
2.4 Merit Function	42
2.5 Hessian Approximation	44
2.6 Sparse SQP Algorithm	45
2.7 Defective Subproblems	48
2.8 Feasible Point Strategy	49
2.9 Computational Experience	52
2.10 Nonlinear Least Squares	56
3 Optimal Control Preliminaries	61
3.1 The Transcription Method	61
3.2 Dynamic Systems	61
3.3 Shooting Method	62
3.4 Multiple Shooting Method	63
3.5 Initial Value Problems	65
3.6 Boundary Value Example	72

3.7	Dynamic Modeling Hierarchy	75
3.8	Function Generator	76
4	The Optimal Control Problem	81
4.1	Introduction	81
4.2	Necessary Conditions for the Discrete Problem	84
4.3	Direct versus Indirect Methods	85
4.4	General Formulation	87
4.5	Direct Transcription Formulation	89
4.6	NLP Considerations—Sparsity	92
4.7	Mesh Refinement	107
4.8	Scaling	121
4.9	Quadrature Equations	123
4.10	What Can Go Wrong	125
5	Optimal Control Examples	133
5.1	Space Shuttle Reentry Trajectory	133
5.2	Minimum Time to Climb	138
5.3	Low-Thrust Orbit Transfer	147
5.4	Two-Burn Orbit Transfer	152
5.5	Industrial Robot	165
5.6	Multibody Mechanism	170
	Appendix: Software	177
A.1	Simplified Usage Dense NLP	177
A.2	Sparse NLP with Sparse Finite Differences	177
A.3	Optimal Control Using Sparse NLP	178
	Bibliography	181
	Index	189
