

Contents

Preface	vii
Resonant Geometric Phases for Soliton Equations M.S. ALBER and J.E. MARSDEN	1
Schur Flows for Orthogonal Hessenberg Matrices GREGORY S. AMMAR AND WILLIAM B. GRAGG	27
Sub-Riemannian Optimal Control Problems ANTHONY M. BLOCH, PETER E. CROUCH AND TUDOR S. RATIU	35
Systems of Hydrodynamic Type, Connected with the Toda Lattice and the Volterra Model O.I. BOGOYAVLENSKIJ	49
The Double Bracket Equation as the Solution of a Variational Problem ROGER BROCKETT	69
Integration and Visualization of Matrix Orbits on the Connection Machine JEAN-PHILIPPE BRUNET	77
A List of Matrix Flows with Applications MOODY T. CHU	87
The Gibbs Variational Principle, Gradient Flows and Interior-Point Methods LEONID FAYBUSOVICH	99
Optimization Techniques on Riemannian Manifolds STEVEN T. SMITH	113
On the Number of Real Roots of a Sparse Polynomial System BERND STURMFELS	137
Gradient Flows for Local Minima of Combinatorial Optimization Problems WING SHING WONG	145
