

Contents

	Introduction	1
I	Periodic Orbits	5
	1 Šarkovskii's theorem	5
	2 Supplementary remarks	13
II	Turbulence	25
	1 Preliminary results	25
	2 Main theorems	28
	3 Symbolic dynamics	34
	4 Perturbed maps	38
	5 Smooth maps	41
III	Unstable Manifolds and Homoclinic Points	47
	1 Unstable manifolds of fixed points	47
	2 Unstable manifolds of periodic points	53
	3 Homoclinic points	59
	Notes	66
IV	Topological Dynamics	69
	1 Limit sets	69
	2 Recurrent and non-wandering points	77
	Notes	88
V	Topological Dynamics (continued)	91
	1 Minimal sets and strong recurrence	91
	2 Asymptotically stable sets	99
	3 Chain recurrence	106

VI	Chaotic and Non-chaotic Maps	121
	1 Characterizations of chaotic maps	121
	2 Regular recurrence for non-chaotic maps	128
	3 Uniformly non-chaotic maps	136
	4 Chain recurrence for non-chaotic maps	150
	5 Transitivity and topological mixing	154
	6 Piecewise monotone maps	163
	Notes	166
VII	Types of Periodic Orbits	167
	1 Forcing	167
	2 Primary periodic orbits	176
VIII	Topological Entropy	189
	1 Definition and general properties	189
	2 Results for a compact interval	196
	3 Misiurewicz's theorem	208
IX	Maps of the Circle	219
	1 Lifts	219
	2 Periodic points	222
	3 Topological dynamics	224
	4 Topological entropy and chaotic maps	227
	5 Degree one maps	230
	References	235
	Index	243
	Notations	249
