Contents

CHAPTER VII. — HAAR MEASURE VII.1

§1. *Construction of a Haar measure* VII.1

1. Definitions and notations VII.1
2. The existence and uniqueness theorem VII.6
3. Modulus VII.10
4. Modulus of an autormorphism VII.13
5. Haar measure of a product VII.14
6. Haar measure of an inverse limit VII.15
7. Local definition of a Haar measure VII.18
8. Relatively invariant measures VII.19
9. Quasi-invariant measures VII.20
10. Locally compact fields VII.21
11. Finite-dimensional algebras over a locally compact field VII.25

§2. *Quotient of a space by a group; homogeneous spaces* VII.27

1. General results VII.27
2. The case $\chi = 1$ VII.29
3. Another interpretation of $\lambda^\sharp$ VII.32
4. The case that X/H is paracompact VII.36
5. Quasi-invariant measures on a homogeneous space VII.38
6. Relatively invariant measures on a homogeneous space . VII.43
7. Haar measure on a quotient group VII.44
8. A transitivity property VII.45
9. Construction of the Haar measure of a group from the Haar measures of certain subgroups VII.48
10. Integration on a fundamental domain VII.50

§3. *Applications and examples* VII.53

1. Compact groups of linear mappings VII.53
2. Triviality of fibered spaces and of group extensions VII.55
3. Examples: 1. General Linear group VII.60
   2. Affine group VII.61
   3. Strict triangular group VII.62
   4. Large triangular group VII.63
   5. Special triangular group VII.66

6. Special linear group VII.67
7. Iwasawa decomposition of $\mathbf{GL}(n, \mathrm{K})$ VII.69
8. Spaces of hermitian forms VII.72
Appendix I VII.74
Appendix II VII.76
Exercises for §1 ..... VII.78
Exercises for §2 ..... VII.87
Exercises for §3 ..... VII.91

CHAPTER VIII. — CONVOLUTION AND REPRESENTATIONS VIII.1

§1. *Convolution* VIII.1
1. Definition and examples VIII.1
2. Associativity VIII.3
3. The case of bounded measures VIII.6
4. Properties concerning supports VIII.6
5. Vectorial expression of the convolution product VIII.7

§2. *Linear representations of groups* VIII.8
1. Continuous linear representations VIII.8
2. Contragradient representation VIII.10
3. Example: linear representations in spaces of continuous functions VIII.11
4. Example: linear representations in spaces of measures .. VIII.12
5. Example: linear representations in the spaces L^p VIII.13
6. Extension of a linear representation of G to the measures on G VIII.15
7. Relations between the endomorphisms $U(\mu)$ and the endomorphisms $U(s)$ VIII.16

§3. *Convolution of measures on groups* VIII.18
1. Algebras of measures VIII.18
2. The case of a group operating on a space VIII.21
3. Convolution and linear representations VIII.22

§4. *Convolution of measures and functions* VIII.24
1. Convolution of a measure and a function VIII.24
2. Examples of convolvable measures and functions VIII.28
3. Convolution and transposition VIII.34
4. Convolution of a measure and a function on a group ... VIII.37
5. Convolution of functions on a group VIII.38
6. Applications VIII.42
7. Regularization VIII.44

§5. *The space of closed subgroups* VIII.46

1. The space of Haar measures on the closed subgroups of G VIII.46
2. Semi-continuity of the volume of the homogeneous space VIII.48
3. The space of closed subgroups of G VIII.51
4. The case of groups without arbitrarily small finite subgroups VIII.53
5. The case of abelian groups VIII.55
6. Another interpretation of the topology of the space of closed subgroups VIII.56

Exercises for §1 ..... VIII.59
Exercises for §2 ..... VIII.59
Exercises for §3 ..... VIII.61
Exercises for §4 ..... VIII.65
Exercises for §5 ..... VIII.73
Historical Note (Chs. VII and VIII) VIII.75

CHAPTER IX. — MEASURES ON HAUSDORFF TOPOLOGICAL SPACES IX.1

§1. *Premeasures and measures on a topological space* IX.1

1. Encumbrances IX.1
2. Premeasures and measures IX.3
3. Examples of measures IX.6
4. Locally negligible sets and functions IX.8
5. Measurable sets and functions IX.9
6. Directed familes; support of a measure IX.11
7. Upper envelopes and sums of measures IX.12
8. Crushings IX.13
9. Upper integral IX.17
10. Integration theory IX.20

§2. *Operations on measures* IX.22

1. Induced measure on a measurable subspace IX.22
2. Measures defined by numerical densities IX.24
3. Image of a measure IX.26
4. Lifting of measures IX.29
5. Product of two measures IX.31
6. Integration with respect to the product of two measures IX.33
7. A result on the disintegration of measures IX.37

§3. *Measures and additive set functions* IX.41
1. Measures and additive set functions of compact sets ... IX.41
2. Inner regular set functions IX.44
3. Radon spaces IX.46

§4. *Inverse limits of measures* IX.49
1. Complements on compact spaces and inverse limits IX.50
2. Inverse systems of measures IX.50
3. The case of countable inverse systems IX.54

§5. *Measures on completely regular spaces* IX.56
1. Measures and bounded continuous functions IX.56
2. Bounded measures and linear forms on $\mathscr{C}^b(\mathrm{T})$ IX.59
3. Tight convergence of bounded measures IX.60
4. Application: topological properties of the space $\mathscr{M}_+^b(\mathrm{T})$ IX.63
5. Compactness criterion for tight convergence IX.64
6. Tight convergence of measures and compact convergence of functions IX.67
7. Application: The Laplace transformation IX.68

§6. *Promeasures and measures on a locally convex space* IX.72
1. Promeasures on a locally convex space IX.72
2. Image of a promeasure IX.74
3. Fourier transform of a promeasure IX.75
4. Calculation of Gaussian integrals IX.77
5. Gaussian promeasures and measures IX.78
6. Examples of Gaussian promeasures IX.82
7. Wiener measure IX.85
8. Continuity of the Fourier transform IX.92
9. Minlos's lemma IX.93
10. Measures on the dual of a nuclear space IX.96
11. Measures on a Hilbert space IX.97
*12. Relations with functions of positive type$_*$ IX.99

ANNEX: *Complements on Hilbert spaces* IX.102
1. Trace of a quadratic form with respect to another IX.102
2. Hilbert–Schmidt mappings IX.104

Exercises for §1 ..... IX.106
Exercises for §2 ..... IX.108
Exercises for §3 ..... IX.108
Exercises for §4 ..... IX.112
Exercises for §5 ..... IX.113
Exercises for §6 ..... IX.117

Exercises for the Annex IX.118
Historical note IX.120
Index of notations 309
Index of terminology 311
Principal formulas of Chapter VII 318
Conditions sufficient for the existence of the convolution product . 320
