CONTENTS

CONTENTS V

CHAPTER VII CARTAN SUBALGEBRAS AND REGULAR ELEMENTS

§ **1. Primary decomposition of linear representations** 1
1. Decomposition of a family of endomorphisms 1
2. The case of a linear family of endomorphisms 6
3. Decomposition of representations of a nilpotent Lie algebra 8
4. Decomposition of a Lie algebra relative to an automorphism 11
5. Invariants of a semi-simple Lie algebra relative to a semi-simple action 11

§ **2. Cartan subalgebras and regular elements of a Lie algebra** 12
1. Cartan subalgebras 13
2. Regular elements of a Lie algebra 16
3. Cartan subalgebras and regular elements 18
4. Cartan subalgebras of semi-simple Lie algebras 19

§ **3. Conjugacy theorems** 20
1. Elementary automorphisms 20
2. Conjugacy of Cartan subalgebras 22
3. Applications of conjugacy 24
4. Conjugacy of Cartan subalgebras of solvable Lie algebras .. 25
5. Lie group case 26

§ **4. Regular elements of a Lie group** 27
1. Regular elements for a linear representation 27
2. Regular elements of a Lie group 29
3. Relations with regular elements of the Lie algebra 31
4. Application to elementary automorphisms 34

§ **5. Decomposable linear Lie algebras** 34
1. Decomposable linear Lie algebras 34
2. Decomposable envelope 37
3. Decompositions of decomposable algebras 37
4. Linear Lie algebras of nilpotent endomorphisms 39
5. Characterizations of decomposable Lie algebras 43

Appendix I - Polynomial maps and Zariski topology 45
1. Zariski topology 45
2. Dominant polynomial maps 46

Appendix II - A connectedness property 48

Exercises for § 1 51
Exercises for § 2 55
Exercises for § 3 57
Exercises for § 4 63
Exercises for § 5 63
Exercises for Appendix I 66
Exercises for Appendix II 67

CHAPTER VIII SPLIT SEMI-SIMPLE LIE ALGEBRAS

§ **1. The Lie algebra $\mathfrak{sl}(2, k)$ and its representations** 69
1. Canonical basis of $\mathfrak{sl}(2, k)$ 69
2. Primitive elements of $\mathfrak{sl}(2, k)$-modules 70
3. The simple modules $\mathrm{V}(m)$ 72
4. Linear representations of the group $\mathbf{SL}(2, k)$ 74
5. Some elements of $\mathbf{SL}(2, k)$ 76

§ **2. Root system of a split semi-simple Lie algebra** 77
1. Split semi-simple Lie algebras 77
2. Roots of a split semi-simple Lie algebra 78
3. Invariant bilinear forms 83
4. The coefficients $\mathrm{N}_{\alpha\beta}$ 83

§ **3. Subalgebras of split semi-simple Lie algebras** 86
1. Subalgebras stable under ad $\mathfrak{h}$ 86
2. Ideals 89
3. Borel subalgebras 90
4. Parabolic subalgebras 92
5. Non-split case 94

§ 4. **Split semi-simple Lie algebra defined by a reduced root system** 95
1. Framed semi-simple Lie algebras 95
2. A preliminary construction 96
3. Existence theorem 100
4. Uniqueness theorem 104

§ 5. **Automorphisms of a semi-simple Lie algebra** 106
1. Automorphisms of a framed semi-simple Lie algebra 106
2. Automorphisms of a split semi-simple Lie algebra 107
3. Automorphisms of a splittable semi-simple Lie algebra 111
4. Zariski topology on $\mathrm{Aut}(\mathfrak{g})$ 113
5. Lie group case 115

§ 6. **Modules over a split semi-simple Lie algebra** 115
1. Weights and primitive elements 116
2. Simple modules with a highest weight 118
3. Existence and uniqueness theorem 119
4. Commutant of $\mathfrak{h}$ in the enveloping algebra of $\mathfrak{g}$ 122

§ 7. **Finite dimensional modules over a split semi-simple Lie algebra** 124
1. Weights of a finited imensional simple $\mathfrak{g}$-module 124
2. Highest weight of a finite dimensional simple $\mathfrak{g}$-module 126
3. Minuscule weights 130
4. Tensor products of $\mathfrak{g}$-modules 132
5. Dual of a $\mathfrak{g}$-module 134
6. Representation ring 136
7. Characters of $\mathfrak{g}$-modules 139

§ 8. **Symmetric invariants** 141
1. Exponential of a linear form 141
2. Injection of $k[\mathrm{P}]$ into $\mathbf{S}(\mathfrak{h})^*$ 142
3. Invariant polynomial functions 143
4. Properties of Aut_0 148
5. Centre of the enveloping algebra 148

§ 9. **The formula of Hermann Weyl** 152
1. Characters of finite dimensional $\mathfrak{g}$-modules 152
2. Dimensions of simple $\mathfrak{g}$-modules 154
3. Multiplicities of weights of simple $\mathfrak{g}$-modules 156
4. Decomposition of tensor products of simple $\mathfrak{g}$-modules 157

§ **10. Maximal subalgebras of semi-simple Lie algebras** 159

§ **11. Classes of nilpotent elements and $\mathfrak{sl}_2$-triplets** 163
1. Definition of $\mathfrak{sl}_2$-triplets 163
2. $\mathfrak{sl}_2$-triplets in semi-simple Lie algebras 165
3. Simple elements 167
4. Principal elements 170

§ **12. Chevalley orders** 173
1. Lattices and orders 173
2. Divided powers in a bigebra 173
3. Integral variant of the Poincaré-Birkhoff-Witt theorem 174
4. Example: polynomials with integer values 176
5. Some formulas 178
6. Biorders in the enveloping algebra of a split reductive Lie algebra 180
7. Chevalley orders 185
8. Admissible lattices 187

§ **13. Classical splittable simple Lie algebras** 189
1. Algebras of type A_l ($l \geq 1$) 190
2. Algebras of type B_l ($l \geq 1$) 195
3. Algebras of type C_l ($l \geq 1$) 204
4. Algebras of type D_l ($l \geq 2$) 211

Table 1 217

Table 2 218

Exercises for § 1 219
Exercises for § 2 226
Exercises for § 3 229
Exercises for § 4 231
Exercises for § 5 233
Exercises for § 6 238
Exercises for § 7 238
Exercises for § 8 250
Exercises for § 9 253
Exercises for § 10 260
Exercises for § 11 261
Exercises for § 13 266

Summary of some important properties of semi-simple Lie algebras 273

CHAPTER IX COMPACT REAL LIE GROUPS

§ 1. **Compact Lie algebras** 281
1. Invariant hermitian forms 281
2. Connected commutative real Lie groups 282
3. Compact Lie algebras 283
4. Groups whose Lie algebra is compact 284

§ 2. **Maximal tori of compact Lie groups** 287
1. Cartan subalgebras of compact algebras 287
2. Maximal tori 288
3. Maximal tori of subgroups and quotient groups 291
4. Subgroups of maximal rank 292
5. Weyl group 293
6. Maximal tori and covering of homomorphisms 295

§ 3. **Compact forms of complex semi-simple Lie algebras** 296
1. Real forms 296
2. Real forms associated to a Chevalley system 297
3. Conjugacy of compact forms 299
4. Example I: compact algebras of type A_n 300
5. Example II: compact algebras of type B_n and D_n 301
6. Compact groups of rank 1 302

§ 4. **Root system associated to a compact group** 304
1. The group X(H) 304
2. Nodal group of a torus 305
3. Weights of a linear representation 307
4. Roots 309
5. Nodal vectors and inverse roots 311
6. Fundamental group 314
7. Subgroups of maximum rank 316
8. Root diagrams 317
9. Compact Lie groups and root systems 319
10. Automorphisms of a connected compact Lie group 322

§ 5. **Conjugacy classes** 324
1. Regular elements 324
2. Chambers and alcoves 325
3. Automorphisms and regular elements 327
4. The maps $(G/T) \times T \to G$ and $(G/T) \times A \to G_r$ 331

§ 6. Integration on compact Lie groups 333
1. Product of alternating multilinear forms 333
2. Integration formula of H. Weyl 334
3. Integration on Lie algebras 339
4. Integration of sections of a vector bundle 341
5. Invariant differential forms 344

§ 7. Irreducible representations of connected compact Lie groups 347
1. Dominant characters 347
2. Highest weight of an irreducible representation 348
3. The ring R(G) 351
4. Character formula 353
5. Degree of irreducible representations 356
6. Casimir elements 358

§ 8. Fourier transform 359
1. Fourier transforms of integrable functions 360
2. Fourier transforms of infinitely-differentiable functions 362
3. Fourier transforms of central functions 366
4. Central functions on G and functions on T 368

§ 9. Compact Lie groups operating on manifolds 369
1. Embedding of a manifold in the neighbourhood of a compact set 369
2. Equivariant embedding theorem 373
3. Tubes and transversals 375
4. Orbit types 377

Appendix I - Structure of compact groups 381
1. Embedding a compact group in a product of Lie groups 381
2. Projective limits of Lie groups 382
3. Structure of connected compact groups 384

Appendix II - Representations of real, complex or quaternionic type 385
1. Representations of real algebras 385
2. Representations of compact groups 387

Exercises for § 1 389
Exercises for § 2 391
Exercises for § 3 394
Exercises for § 4 396
Exercises for § 5 405

Exercises for § 6 409
Exercises for § 7 414
Exercises for § 8 417
Exercises for § 9 419
Exercises for Appendix I 424
