## CONTENTS

Preface vii

| Chapter 1 | Introduction 1   |  |  |
|-----------|--|--|--|
|           | 1.1 Some Basic Mathematical Models; Direction Fields 1   |  |  |
|           | 1.2 Solutions of Some Differential Equations 10  |  |  |
|           | 1.3 Classification of Differential Equations 19  |  |  |
|           | 1.4 Historical Remarks 26  |  |  |
| Chapter 2 | First Order Differential Equations 31  |  |  |
|           | 2.1 Linear Equations; Method of Integrating Factors 31   |  |  |
|           | 2.2 Separable Equations 42   |  |  |
|           | 2.3 Modeling with First Order Equations 50   |  |  |
|           | 2.4 Differences Between Linear and Nonlinear Equations 68  |  |  |
|           | 2.5 Autonomous Equations and Population Dynamics 78  |  |  |
|           | 2.6 Exact Equations and Integrating Factors 94   |  |  |
|           | 2.7 Numerical Approximations: Euler's Method 101   |  |  |
|           | 2.8 The Existence and Uniqueness Theorem 110   |  |  |
|           | 2.9 First Order Difference Equations 119   |  |  |
| Chapter 3 | Second Order Linear Equations 135  |  |  |
|           | Sciona Craci Lincui Equationis 100   |  |  |
|           | 3.1 Homogeneous Equations with Constant Coefficients 135   |  |  |
|           | <ul> <li>3.1 Homogeneous Equations with Constant Coefficients 135</li> <li>3.2 Fundamental Solutions of Linear Homogeneous Equations 143</li> </ul>  |  |  |
| <u></u>   | <ul> <li>3.1 Homogeneous Equations with Constant Coefficients 135</li> <li>3.2 Fundamental Solutions of Linear Homogeneous Equations 143</li> <li>3.3 Linear Independence and the Wronskian 153</li> </ul>   |  |  |
|           | <ul> <li>3.1 Homogeneous Equations with Constant Coefficients 135</li> <li>3.2 Fundamental Solutions of Linear Homogeneous Equations 143</li> <li>3.3 Linear Independence and the Wronskian 153</li> <li>3.4 Complex Roots of the Characteristic Equation 159</li> </ul>   |  |  |
|           | <ul> <li>3.1 Homogeneous Equations with Constant Coefficients 135</li> <li>3.2 Fundamental Solutions of Linear Homogeneous Equations 143</li> <li>3.3 Linear Independence and the Wronskian 153</li> <li>3.4 Complex Roots of the Characteristic Equation 159</li> <li>3.5 Repeated Roots; Reduction of Order 166</li> </ul>   |  |  |
|           | <ul> <li>3.1 Homogeneous Equations with Constant Coefficients 135</li> <li>3.2 Fundamental Solutions of Linear Homogeneous Equations 143</li> <li>3.3 Linear Independence and the Wronskian 153</li> <li>3.4 Complex Roots of the Characteristic Equation 159</li> <li>3.5 Repeated Roots; Reduction of Order 166</li> <li>3.6 Nonhomogeneous Equations; Method of Undetermined Coefficients 175</li> </ul>  |  |  |
|           | <ul> <li>3.1 Homogeneous Equations vito Constant Coefficients 135</li> <li>3.2 Fundamental Solutions of Linear Homogeneous Equations 143</li> <li>3.3 Linear Independence and the Wronskian 153</li> <li>3.4 Complex Roots of the Characteristic Equation 159</li> <li>3.5 Repeated Roots; Reduction of Order 166</li> <li>3.6 Nonhomogeneous Equations; Method of Undetermined Coefficients 175</li> <li>3.7 Variation of Parameters 186</li> </ul>   |  |  |
|           | <ul> <li>3.1 Homogeneous Equations vito Constant Coefficients 135</li> <li>3.2 Fundamental Solutions of Linear Homogeneous Equations 143</li> <li>3.3 Linear Independence and the Wronskian 153</li> <li>3.4 Complex Roots of the Characteristic Equation 159</li> <li>3.5 Repeated Roots; Reduction of Order 166</li> <li>3.6 Nonhomogeneous Equations; Method of Undetermined Coefficients 175</li> <li>3.7 Variation of Parameters 186</li> <li>3.8 Mechanical and Electrical Vibrations 192</li> </ul>   |  |  |

## Contents

| •         |   | ,  |
|-----------|---|--|
| Chapter 5 | Seri  | es Solutions of Second Order Linear Equations 243  |
|           | 5.1   | Review of Power Series 243   |
|           | 5.2   | Series Solutions Near an Ordinary Point, Part I 250  |
|           | 5.3   | Series Solutions Near an Ordinary Point, Part II 261   |
|           | 5.4   | Regular Singular Points 268  |
|           | 5.5   | Euler Equations 273  |
|           | 5.6   | Series Solutions Near a Regular Singular Point, Part I 279   |
|           | 5.7   | Series Solutions Near a Regular Singular Point, Part II 286  |
|           | 5.8   | Bessel's Equation 294  |
| Chapter 6 | The   | Laplace Transform 307  |
|           | 6.1   | Definition of the Laplace Transform 307  |
|           | 6.2   | Solution of Initial Value Problems 314   |
|           | 6.3   | Step Functions 325   |
|           | 6.4   | Differential Equations with Discontinuous Forcing Functions 332  |
|           | 6.5   | Impulse Functions 340  |
|           | 6.6   | The Convolution Integral 346   |
| Chapter 7 | Syst  | ems of First Order Linear Equations 355  |
|           | 7.1   | Introduction 355   |
|           | 7.2   | Review of Matrices 364   |
|           | 7.3   | Linear Algebraic Equations; Linear Independence, Eigenvalues,<br>Eigenvectors 374  |
| Į.        | 7.4   | Basic Theory of Systems of First Order Linear Equations 385  |
|           | 7.5   | Homogeneous Linear Systems with Constant Coefficients 390  |
|           | 7.6   | Complex Eigenvalues 401  |
|           |   |  |
|           | 7.7   | Fundamental Matrices 414   |

- 8.4 Multistep Methods 462
- 8.5 More on Errors; Stability 468
- 8.6 Systems of First Order Equations 478

| Chapter 9  | Nonlinear Differential Equations and Stability 483                 |
|------------|--|
| Chapter 5  | 1 The Diversion Linear Surfaces 492                                |
|            | 9.1 The Phase Plane: Linear Systems 483                            |
|            | 9.2 Almost Linear Systems and Stability 495                        |
|            | 9.3 Almost Linear Systems 503                                      |
|            | 9.4 Competing Species 515  |
|            | 9.5 Predator-Prey Equations 528                                    |
|            | 9.6 Liapunov's Second Method 536                                   |
|            | 9.7 Periodic Solutions and Limit Cycles 547                        |
|            | 9.8 Chaos and Strange Attractors: The Lorenz Equations 558         |
| Chapter 10 | Partial Differential Equations and Fourier Series 569              |
|            | 10.1 Two-Point Boundary Value Problems 569                         |
|            | 10.2 Fourier Series 576  |
|            | 10.3 The Fourier Convergence Theorem 587                           |
|            | 10.4 Even and Odd Functions 594                                    |
|            | 10.5 Separation of Variables; Heat Conduction in a Rod 603         |
|            | 10.6 Other Heat Conduction Problems 612                            |
|            | 10.7 The Wave Equation: Vibrations of an Elastic String 623        |
|            | 10.8 Laplace's Equation 638  |
|            | Appendix A Derivation of the Heat Conduction Equation 649          |
|            | Appendix B Derivation of the Wave Equation 653                     |
| Chapter 11 | Boundary Value Problems 657  |
|            | 11.1 The Occurrence of Two-Point Boundary Value Problems 657       |
|            | 11.2 Sturm-Liouville Boundary Value Problems 665                   |
|            | 11.3 Nonhomogeneous Boundary Value Problems 679                    |
|            | 11.4 Singular Sturm-Liouville Problems 695                         |
|            | 11.5 Further Remarks on the Method of Separation of Variables: A B |

\_\_\_\_\_

11.5 Further Remarks on the Method of Separation of Variables: A Bessel Series Expansion 702

.

11.6 Series of Orthogonal Functions: Mean Convergence 709
