Contents

FLOW PROBLEMS

Analysis of a domain decomposition method for the coupling of Stokes and Darcy equations *	3
<i>M. Discacciati, A. Quarteroni</i>	
Residual-free bubbles for a singular perturbation equation	21
<i>M. I. Asensio, L. P. Franca, A. Russo</i>	
High-order IMEX-RK finite volume methods for multidimensional hyperbolic systems	35
<i>E. Bertolazzi, G. Manzini</i>	
High-order central WENO schemes for 1D Hamilton–Jacobi equations ..	45
<i>S. Bryson, D. Levy</i>	
Asymptotic analysis of coupled problems for compressible flows	55
<i>C. A. Coclici, J. Heiermann, Gh. Moroşanu, W. L. Wendland</i>	
On the discontinuous Galerkin method for the numerical solution of compressible high-speed flow	65
<i>V. Dolejší, M. Feistauer</i>	
Comparison of two conservative schemes for hyperbolic interface problems	85
<i>R. Fazio</i>	
Adaptive numerical flow simulation	95
<i>J. Felcman</i>	
Flood modelling using mixed-hybrid finite elements	103
<i>M. Hokr, J. Maryška, R. Smetana</i>	
High-order relaxation methods for incompressible Navier–Stokes equations	111
<i>A. Klar, M. Seaid</i>	
New nonconforming finite elements for solving the incompressible Navier–Stokes equations	123
<i>P. Knobloch</i>	
Explicit and implicit high-resolution finite element schemes based on the flux-corrected-transport algorithm	133
<i>D. Kuzmin, S. Turek</i>	

Genuinely multidimensional evolution Galerkin schemes for the shallow water equations	145
<i>M. Lukáčová-Medvidová, J. Saibertová</i>	
Mixed-hybrid FEM discrete fracture network model of the fracture flow	155
<i>J. Maryška, O. Severýn, M. Vohralík</i>	
Numerical evaluation of FEM with application to the 1D advection-diffusion problem	165
<i>G. Sangalli</i>	
Numerical simulation of interfacial flows	173
<i>A. Smolianski</i>	
A family of finite difference schemes for the convection-diffusion equation in two dimensions	179
<i>E. Sousa, I. Sobey</i>	
An unstructured staggered scheme for the Navier–Stokes equations	189
<i>I. Wenneker, G. Segal, P. Wesseling</i>	

ELECTROMAGNETIC PROBLEMS

Adaptive domain decomposition techniques in electromagnetic field computation and electrothermomechanical coupling problems *	201
<i>R. H. W. Hoppe</i>	
Computation of Maxwell eigenvalues on curvilinear domains using <i>hp</i>-version Nédélec elements	219
<i>M. Ainsworth, J. Coyle</i>	
FE solution of a 3D-thermoelectrical model for metallurgical electrodes	233
<i>A. Bermúdez, J. Bullón, P. Salgado</i>	
On the time-harmonic Maxwell equations in general domains	243
<i>D. Boffi, L. Gastaldi</i>	
FI²TD schemes for magnetic field simulations: new formulations and algorithmic improvements	255
<i>M. Clemens, T. Weiland</i>	
A boundary integral formulation of antenna problems suitable for nodal-based wavelet approximations	265
<i>M. Costabel, C. Sifa</i>	

Weighted regularization of Maxwell equations: computations in curvilinear polygons	273
<i>M. Costabel, M. Dauge, D. Martin, G. Vial</i>	
Perfectly matched layers in transmission lines	281
<i>G. Hebermehl, F.-K. Hübner, R. Schlundt, T. Tischler, H. Zscheile, W. Heinrich</i>	
The computational modelling of micromagnetic fine structures in uniaxial ferromagnets using the nonconforming domain decomposition method	291
<i>P. Klouček, L. A. Melara</i>	

 ELASTICITY AND STRUCTURES

Towards the convergence of 3D and shell finite elements? *	303
<i>D. Chapelle</i>	
A shell model allowing folds	317
<i>S. Anicic</i>	
A Signorini frictionless contact problem for viscoelastic materials with long-term memory	327
<i>Á. D. Rodríguez-Arós, M. Sofonea, J. M. Viaño</i>	
Numerical analysis of a contact problem for elastic-visco-plastic materials with damage	337
<i>O. Chau, J. R. Fernández, W. Han, M. Sofonea</i>	
PSRI schemes for shells: a benchmark study	347
<i>C. Chinosi, G. Sacchi</i>	
Propagation of singularities on thin shells with hyperbolic regions	357
<i>H. Hakula</i>	
An analysis of asymptotic consistency error in a parameter-dependent model problem	365
<i>V. Havu</i>	
Homogenized elasticity solvers for biomorphic microcellular ceramics	371
<i>R. H. W. Hoppe, S. I. Petrova</i>	
Energy estimates for shell problems	381
<i>C. Lovadina</i>	

 NUMERICAL PROBLEMS IN FINANCE

- Functional approximation and estimation for latent variable systems** 391
E. Capobianco
- The boundary value formulation of the Asian call option** 409
J. Hugger
- WENO and blended BDF discretizations for option pricing problems** 419
C. W. Oosterlee, F. J. Gaspar, J. C. Frisch
- A nonlinear PDE in mathematical finance** 429
S. Polidoro

 NUMERICAL METHODS FOR KINETIC EQUATIONS

- An adaptive numerical method for the Vlasov equation
 based on a multiresolution analysis** 437
N. Besse, F. Filbet, M. Gutnic, I. Paun, E. Sonnendrücker
- A brief review of numerical methods for collision operators** 447
S. Cordier, S. Mancini
- Numerical methods for the Vlasov equation** 459
F. Filbet, E. Sonnendrücker
- On the fast evaluation of kinetic equations for driven granular flows** 469
L. Pareschi

 SINGULAR FREE BOUNDARY PROBLEMS

- Linear co-volume scheme
 for anisotropic curvature driven motions** 483
S. Corsaro, V. De Simone, A. Handlovičová, K. Mikula, F. Sgallari
- Consistency of a large time-step scheme for mean curvature motion** 495
M. Falcone, R. Ferretti
- A scheme for the shape-from-shading model with “black shadows”** 503
M. Falcone, M. Sagona, A. Seghini
- A Cahn–Hilliard equation with non-homogeneous mobility
 and its application to image processing** 513
S. Finzi Vita

 OTHER APPLICATIONS

- Inverse problem for the 3D equation of radiative transfer** 525
G. S. Abdoulaev, A. H. Hielscher
- Numerical analysis of a coupled radiative-conductive heat transfer problem** 535
F. Asllanaj, G. Jeandel, J. R. Roche, D. Schmitt
- Hybrid FEM/FDM method for an inverse scattering problem** 545
L. Beilina, C. Johnsson
- The discrete maximum principle for stabilized finite element methods** . . . 557
E. Burman, A. Ern
- Mixed hybrid model of flow in combustion engines** 567
L. Čížková, J. Maryška, J. Šembera
- A subgrid projection method for relaxation of non-attainable differential inclusions** 575
D. Cox, P. Klouček, D. R. Reynolds
- Some remarks on fixed point and Newton techniques for solving the S_2 approximation of transient radiative transfer** 585
M. Falcone, Ó. López Pouso
- Numerical results and error estimates for the finite element solution of problems with nonlinear boundary condition on nonpolygonal domains** 593
P. Sváček, K. Najzar

 A POSTERIORI ESTIMATES AND ADAPTIVITY

- Multiscale adaptive processing for evolution equations** * 605
A. Cohen
- Sobolev regularity estimation for hp -adaptive finite element methods** * . . 631
P. Houston, B. Senior, E. Süli
- Robustness in a posteriori error estimates for the Oseen equations with general boundary conditions** 657
S. Berrone
- A posteriori estimates for FE-solutions of variational inequalities** 669
H. Blum, A. Schröder, F. T. Suttmeier

Adaptive mesh refinement based on a posteriori error estimates for Stokes flow in a 2D problem	681
<i>P. Burda, J. Novotný, B. Sousedík</i>	
Explicit error in a finite element method	691
<i>P. Destuynder</i>	
An adaptive p-wavelet method in a domain decomposition framework ...	701
<i>S. Falletta</i>	
Adaptive FEM for eigenvalue problems	713
<i>V. Heuveline, R. Rannacher</i>	
A posteriori error estimators for a model parameter estimation problem .	723
<i>K. Kunisch, W. B. Liu, N. Yan</i>	
An anisotropic recovery-based a posteriori error estimator	731
<i>S. Micheletti, S. Perotto</i>	
A wavelet-based adaptive scheme for the solution of nonlinear equations .	743
<i>M. Verani</i>	

DISCONTINUOUS GALERKIN FINITE ELEMENT METHODS

LDG methods for Stokes flow problems	755
<i>B. Cockburn, G. Kanschat, D. Schötzau</i>	
A P^2-continuous, P^1-discontinuous finite element method for the Mindlin–Reissner plate model	765
<i>P. Hansbo, M. G. Larson</i>	
Goal-oriented a posteriori error estimation for compressible fluid flows ..	775
<i>R. Hartmann, P. Houston</i>	
hp-DGFEM for Maxwell’s equations	785
<i>P. Houston, I. Perugia, D. Schötzau</i>	
Multilevel preconditioners for the interior penalty method	795
<i>J. Gopalakrishnan, G. Kanschat</i>	
A survey of DG methods for elliptic problems	805
<i>L. D. Marini</i>	

DOMAIN DECOMPOSITION METHODS

The Chimera method for a model problem	817
<i>F. Brezzi, J.-L. Lions[†], O. Pironneau</i>	

Virtual control for fourth-order problems and for heterogeneous fourth-order second-order coupling	827
<i>P. Gervasio</i>	
Nitsche-type finite element method for elliptic problems with singularities	837
<i>B. Heinrich</i>	
Mortar element coupling between global scalar and local vector potentials to solve eddy current problems	847
<i>Y. Maday, F. Rapetti, B. I. Wohlmuth</i>	
A mosaic preconditioner for a dual Schur complement	867
<i>E. Tyrtshnikov, Y. Vassilevski</i>	

ODE, IDE, AND RELATED PROBLEMS

A computational algorithm for Rjabov's method for real inversion of Laplace transforms	881
<i>S. Cuomo, L. D'Amore, A. Murlì</i>	
A high-order BVM approach to computation of embedded eigenvalues in Sturm–Liouville problems	891
<i>P. Ghelardoni, G. Gheri, M. Marletta</i>	
Numerical solution of boundary value problems with deviated arguments	899
<i>T. Jankowski</i>	
Theory of implicit extrapolation methods for ordinary differential equations	909
<i>G. Yu. Kulikov</i>	
Spline collocation methods for weakly singular Volterra integro-differential equations	919
<i>I. Pats, A. Pedas</i>	

NUMERICAL LINEAR ALGEBRA

Linear systems of equations arising in the (almost) FEM solution of low-frequency electromagnetic problems	931
<i>P. Alotto</i>	
A preconditioned Krylov subspace solver for a saddle-point model of a single-phase induction machine	941
<i>H. De Gersem, S. Vandewalle, K. Hameyer</i>	

Application of AMG to the numerical simulation of 3D ultrasonic transducers	949
<i>E. Heikkola, J. Martikainen</i>	
Bi-CGSTAB for collocation equations on distributed memory parallel architectures	957
<i>E. N. Mathioudakis, E. P. Papadopoulou, Y. G. Saridakis</i>	
Two-level preconditioning of a discontinuous Galerkin method for radiation diffusion	967
<i>J. S. Warsa, M. Benzi, T. A. Wareing, J. E. Morel</i>	
A new preconditioner for the Oseen equations	979
<i>A. Wathen, D. Loghin, D. Kay, H. Elman, D. Silvester</i>	
Analysis of convergence of a restarted GMRES method augmented with eigenvectors	989
<i>J. Zítko</i>
