

CONTENTS

Foreword	v
Part I. Dynamic Fracture Problems	
Elastodynamic Fracture Mechanics.....	3
J. D. ACHENBACH	
A One-Dimensional Dynamic Crack Propagation Model.....	21
L. B. FREUND	
The Stability of a Rapid Shear Crack with Finite Cohesive Trac- tion (Abstract only).....	39
R. BURRIDGE, G. CONN, and L. B. FREUND	
Part II. Seismic Source Theory	
Evolution of Quantitative Models of Earthquakes.....	43
K. AKI	
Seismic Radiation from Earthquake Models Based on Fracture Mechanics.....	59
R. MADARIAGA	
Part III. Nonlinear Fields and Integral Conservation Laws	
Crack Problems in Finite Elastostatics.....	81
J. K. KNOWLES	
The Solution of Elastoplastic Fracture Problems by Matched Asymptotic Expansions.....	97
J. R. WILLIS	
Stress Intensity Factor Calculations Based on the <i>M</i> -Integral Con- servation Law.....	111
L. B. FREUND	
Part IV. Rate-Dependent and Nonelastic Crack Growth	
Some Mathematical Problems of Elastic-Plastic Crack Growth.....	125
J. C. AMAZIGO	
On the Analysis of Crack Initiation and Growth in Nonhomo- geneous Viscoelastic Media.....	137
R. A. SCHAPERY	
The Analysis of Propagating Slip Zones in Porous Elastic Media.....	153
D. A. SIMONS
