

TABLE OF CONTENTS

Preface	vii
Foreword	ix
Bailey's transform, lemma, chains and tree George E. Andrews	1
Riemann-Hilbert problems for multiple orthogonal polynomials Walter Van Assche, Jeffrey S. Geronimo and Arno B. J. Kuijlaars	23
Flowers which we cannot yet see growing in Ramanujan's garden of hypergeometric series, elliptic functions and q 's Bruce C. Berndt	61
Orthogonal rational functions and continued fractions Adhemar Bultheel, Pablo Gonzalez-Vera, Erik Hendriksen and Olav Njåstad	87
Orthogonal polynomials and reflection groups Charles F. Dunkl	111
The bispectral problem: an overview F. Alberto Grünbaum	129
The Bochner-Krall problem: some new perspectives Luc Haine	141
Lectures on q -orthogonal polynomials Mourad E. H. Ismail	179
The Askey-Wilson function transform scheme Erik Koelink and Jasper V. Stokman	221
Arithmetic of the partition function Ken Ono	243

The associated classical orthogonal polynomials Mizan Rahman	255
Special functions defined by analytic difference equations S. N. M. Ruijsenaars	281
The factorization method, self-similar potentials and quantum algebras V. P. Spiridonov	335
Generalized eigenvalue problem and a new family of rational functions biorthogonal on elliptic grids V. P. Spiridonov and A. S. Zhedanov	365
Orthogonal polynomials and combinatorics Dennis Stanton	389
Basic exponential functions on a q -quadratic grid Sergei K. Suslov	411
Projection operator method for quantum groups V. N. Tolstoy	457
Uniform asymptotic expansions R. Wong	489
Exponential asymptotics R. Wong	505
Index	519
