

Contents

| | |
|---|-----|
| Preface | ix |
| Part I. Advances in Logic | |
| The mathematical structure of logical syntax JEAN-YVES BÉZIAU | 3 |
| Quantifiers for reasoning with imperfect information and Σ_1^1 -logic XAVIER CAICEDO AND MICHAŁ KRYNICKI | 17 |
| Society semantics and multiple-valued logics WALTER A. CARNIELLI AND MAMEDE LIMA-MARQUES | 33 |
| A topological approach to the logic underlying fuzzy subset theory JOSÉ CARLOS CIFUENTES | 53 |
| Categorical logic with partial elements MARCELO E. CONIGLIO | 63 |
| Algebraic K-theory of fields and special groups MAX DICKMANN AND FRANCISCO MIRAGLIA | 83 |
| Closed ideals of MV-algebras ANTONIO DI NOLA, GEORGE GEORGESCU, AND SALVATORE SESSA | 99 |
| Definitions of adjunction KOSTA DOŠEN | 113 |
| A reduced spectrum for MV-algebras NÉSTOR G. MARTÍNEZ | 127 |
| Part II. Advances in Theoretical Computer Science | |
| A tableau calculus for Dummett predicate logic ALESSANDRO AVELLONE, MAURO FERRARI, PIERANGELO MIGLIOLI, AND UGO MOSCATO | 135 |
| A hierarchy of unbounded almost rigid classes of finite structures JOSE MARIA TURULL TORRES | 153 |
| Some connections between logic and computer science PAULO A. S. VELOSO | 187 |

Part III. Advances in Philosophical Logic

| | |
|---|-----|
| Opaque predicates, veiled sets and their logic DÉCIO KRAUSE AND STEVEN FRENCH | 263 |
| Truth, quasi-truth and paraconsistency OTÁVIO BUENO | 275 |
| To be a Fregean or to be a Husserlian: That is the question for Platonists GUILLERMO E. ROSADO HADDOCK | 295 |
| A modal framework for consequential implication and the factor law CLAUDIO PIZZI | 313 |
