

Chabert · A History of Algorithms

Springer-Verlag Berlin Heidelberg GmbH

Jean-Luc Chabert (Ed.)

A History of Algorithms

From the Pebble
to the Microchip

With 100 Figures

Springer

Editor

Jean-Luc Chabert, University of Picardy

Authors

Évelyne Barbin, IUFM, Créteil and IREM, University Paris VII

Jacques Borowczyk, IUFM, Orléans-Tours

Jean-Luc Chabert, University of Picardy

Michel Guillemot, University Paul Sabatier and IREM, Toulouse

Anne Michel-Pajus, Lycée Claude Bernard, Paris and IREM, University Paris VII

For Arab Mathematics

Ahmed Djebbar, University Paris XI, Orsay centre

For Chinese Mathematics

Jean-Claude Martzloff, CNRS and Institut des Hautes Études Chinoises, Paris

Translator of the English Edition

Chris Weeks

Title of the original edition:

Histoire d'algorithmes. Du caillou à la puce.

© Éditions Belin, Paris 1994

Cover figure: Éric Durant (1993)

Library of Congress Cataloging-in-Publication Data

Histoire d'algorithmes. English. A history of algorithms: from the pebble to the microchip/ Jean-Luc Chabert (ed.); [authors, Évelyne Barbin... et al.; English translator, Chris Weeks]. p. cm. Includes bibliographical references and index. ISBN 3-540-63369-3 (softcover: alk. paper) 1. Algorithms--History. I. Chabert, Jean-Luc. II. Barbin, E. (Évelyne) III. Title.

Contents

Introduction	1
1 Algorithms for Arithmetic Operations	7
1.1 Sumerian Division	8
1.2 A Babylonian Algorithm for Calculating Inverses	11
1.3 Egyptian Algorithms for Arithmetic.....	15
1.4 Tableau Multiplication.....	20
1.5 Optimising Calculations.....	28
1.6 Simple Division by Difference on a Counting Board.....	30
1.7 Division on the Chinese Abacus.....	35
1.8 Numbers Written as Decimals	37
1.9 Binary Arithmetic.....	40
1.10 Computer Arithmetic.....	43
Bibliography.....	46
2 Magic Squares	49
2.1 Squares with Borders.....	53
2.2 The Marking Cells Method	58
2.3 Proceeding by 2 and by 3.....	64
2.4 Arnould's Borders Method.....	70
Bibliography.....	81
3 Methods of False Position	83
3.1 Mesopotamia: a Geometric False Position.....	86
3.2 Egypt: Problem 26 of the Rhind Papyrus.....	88
3.3 China: Chapter VII of the <i>Jiuzhang Suanshu</i>	91
3.4 India: Bhāskara and the Rule of Simple False Position	96
3.5 Qustā Ibn Lūqā: A Geometric Justification	98
3.6 Ibn al-Bannā: The Method of the Scales	101
3.7 Fibonacci: the <i>Elchatayn</i> rule	103
3.8 Pellos: The Rule of Three and The Method of Simple False Position.....	106
3.9 Clavius: Solving a System of Equations	107
Bibliography.....	111

4	Euclid's Algorithm	113
4.1	Euclid's Algorithm	113
4.2	Comparing Ratios	118
4.3	Bézout's Identity.....	122
4.4	Continued Fractions	126
4.5	The Number of Roots of an Equation	132
	Bibliography.....	136
5	From Measuring the Circle to Calculating π	139
	Geometric Approaches	140
5.1	The Circumference of the Circle.....	140
5.2	The Area of the Circle in the <i>Jiuzhang Suanshu</i>	146
5.3	The Method of Isoperimeters	152
	Analytic Approaches	156
5.4	Arithmetic Quadrature.....	156
5.5	Using Series	161
5.6	Epilogue.....	164
	Bibliography.....	166
6	Newton's Methods	169
	The Tangent Method	170
6.1	Straight Line Approximations.....	170
6.2	Recurrence Formulas	175
6.3	Initial Conditions.....	178
6.4	Measure of Convergence	183
6.5	Complex Roots	188
	Newton's Polygon	191
6.6	The Ruler and Small Parallelograms.....	191
	Bibliography.....	196
7	Solving Equations by Successive Approximations	199
	Extraction of Square Roots	200
7.1	The Method of Heron of Alexandria.....	202
7.2	The Method of Theon of Alexandria.....	203
7.3	Mediaeval Binomial Algorithms.....	205
	Numerical Solutions of Equations	208
7.4	Al-Tūsī's Tables	208
7.5	Viète's Method.....	213
7.6	Kepler's Equation	219
7.7	Bernoulli's Method of Recurrent Series.....	223
7.8	Approximation by Continued Fractions	227

Horner like Transformations of Polynomial Equations	230
7.9 The Ruffini-Budan Schema.....	230
Bibliography.....	236
8 Algorithms in Arithmetic	239
Factors and Multiples.....	240
8.1 The Sieve of Eratosthenes	241
8.2 Criteria For Divisibility.....	243
8.3 Quadratic Residues.....	248
Tests for Primality.....	251
8.4 The Converse of Fermat's Theorem.....	252
8.5 The Lucas Test.....	256
8.6 Pépin's Test.....	260
Factorisation Algorithms.....	263
8.7 Factorisation by the Difference of Two Squares.....	264
8.8 Factorisation by Quadratic Residues	267
8.9 Factorisation by Continued Fractions	269
The Pell-Fermat Equation.....	272
8.10 The Arithmetica of Diophantus	273
8.11 The Lagrange Result.....	275
Bibliography.....	280
9 Solving Systems of Linear Equations.....	283
9.1 Cramer's Rule.....	284
9.2 The Method of Least Squares	287
9.3 The Gauss Pivot Method	291
9.4 A Gauss Iterative Method.....	296
9.5 Jacobi's Method.....	300
9.6 Seidel's Method.....	302
9.7 Nekrasov and the Rate of Convergence.....	306
9.8 Cholesky's Method	310
9.9 Epilogue.....	314
Bibliography.....	315
10 Tables and Interpolation.....	319
10.1 Ptolemy's Chord Tables	321
10.2 Briggs and Decimal Logarithms.....	328
10.3 The Gregory-Newton Formula.....	332
10.4 Newton's Interpolation Polynomial	336
10.5 The Lagrange Interpolation Polynomial	340

10.6 An Error Upper Bound.....	345
10.7 Neville's Algorithm.....	347
Bibliography.....	350
11 Approximate Quadratures	353
11.1 Gregory's Formula	354
11.2 Newton's Three-Eighths Rule.....	356
11.3 The Newton-Cotes Formulas	357
11.4 Stirling's Correction Formulas	359
11.5 Simpson's Rule	362
11.6 The Gauss Quadrature Formulas.....	363
11.7 Chebyshev's Choice	367
11.8 Epilogue.....	369
Bibliography.....	370
12 Approximate Solutions of Differential Equations.....	373
12.1 Euler's Method	374
12.2 The Existence of a Solution.....	378
12.3 Runge's Methods	381
12.4 Heun's Methods.....	388
12.5 Kutta's Methods.....	392
12.6 John Adams and the Use of Finite Differences.....	396
12.7 Epilogue.....	401
Bibliography.....	402
13 Approximation of Functions.....	405
Uniform Approximation	407
13.1 Taylor's Formula.....	407
13.2 The Lagrange Remainder.....	409
13.3 Chebyshev's Polynomial of Best Approximation	412
13.4 Spline-Fitting.....	418
Mean Quadratic Approximation	420
13.5 Fourier Series	422
13.6 The Fast Fourier Transform.....	424
Bibliography.....	427
14 Acceleration of Convergence.....	429
14.1 Stirling's Method for Series.....	430
14.2 The Euler-Maclaurin Summation Formula	434
14.3 The Euler Constant	439

14.4 Aitken's Method	443
14.5 Richardson's Extrapolation Method.....	447
14.6 Romberg's Integration Method.....	451
Bibliography.....	453
15 Towards the Concept of Algorithm	455
Recursive Functions and Computable Functions	458
15.1 The 1931 Definition	458
15.2 General Gödel Recursive Functions	460
15.3 Alonzo Church and Effective Calculability.....	462
15.4 Recursive Functions in the Kleene Sense	466
Machines	468
15.5 The Turing Machine	468
15.6 Post's Machine.....	474
15.7 Conclusion.....	479
Bibliography.....	480
Biographies	481
General Index	517
Index of Names	521
