P O Box 128, Farrer Road, Singapore 912805

USA office: Suite 1B, 1060 Main Street, River Edge, NJ 07661

UK office: 57 Shelton Street, Covent Garden, London WC2H 9HE

Library of Congress Cataloging-in-Publication Data

Chukwu, Ethelbert N.

Differential models and neutral systems for controlling the wealth of nations / E.N. Chukwu.

p. cm. -- (Series on advances in mathematics for applied sciences ; vol. 54)

Includes bibliographical references and index.

ISBN 9810243812 (alk. paper)

1. Econometric models. 2. Economics. I. Title. II. Series.

HB141.C538 2000

Contents

Acknowledgements		vii
Foreword		ix
Introduction		1
0.	Continuous Delay Models: Motivation	7
	References	12
1.	Economic Dynamic Model	15
2.	Main Results	45
3.	Economic Interpretation and Fundamental Economic Principles	53
4.	Economic Hereditary Model of Canada	59
5.	Soft Landing of Key Economic Indicators with Private and Government Controls under Scarcity	61
6.	Economic Systems With Delay in Control	75
7.	The Nonlinear Theory of Controllability of Volterra Neutral Integrodifferential Dynamics	81
8.	Economic Models of U.S.A., Canada, U.K., Germany, and India	89
	References	91
9.	Model Programs and Graphs	95

10.	Optimal Control of Volterra Integral Neutral Equations and of Linear Neutral Equations		107
	10.1	Introduction	107
	10.2	Proof of Minimum-Effort Theorems	135
	10.3	Optimal Absolute Fuel Function	146
		References	172
11.	Nonlinear Neutral Systems		177
	11.1	Introduction	177
	11.2	Existence, Uniqueness, and Continuity of Solutions of Neutral Systems	180
	11.3	Existence of Optimal Controls of Neutral Systems	192
	11.4	Optimal Control of Neutral Systems in Function Space	199
		References	216
12.	Controllable Nonlinear Neutral Systems		219
	12.1	Introduction	219
	12.2	General Nonlinear Systems	219
	12.3	Nonlinear Interconnected Systems	234
		References	240
13.	Function Space Control of Nonlinear Interconnected Economic Systems of Neutral Type		243
	13.1	Introduction	243
	13.2	Preliminaries	247
	13.3	Main Results	252
		References	278
14.	Nonlinear Mathematical Controllability Theory of the Growth of Wealth of Nations		281

14.1 Introduction 281
14.2 The Main Results 281

References 297

15. Oscillation 301

15.1 Introduction 301
15.2 Basic Results 302
15.3 Economic Model 304
15.4 Employment 307
15.5 Policy Implications of Damping Out Employment Oscillation 311

References 313

16. Construction of Econometric Meter and Reform of Global Economic Systems Structure 315

16.1 Design of an Econometric Meter or Econometric Simulator 320
16.2 Salamon's Circuit 336
16.3 Simulation of a Nonlinear Economic State of Gross Domestic Product and Interest Rate 341
16.4 Delay Systems 350
16.5 Tunnel Diode Circuit with Delay: Analogue, Econometric Meter with Delay 353
16.6 Perspective 359

References 363

17. Appendix 365
