Cyclotomic Fields and Zeta Values
Coates, J.; Sujatha, R.
2006, X, 116 p., Hardcover
ISBN: 978-3-540-33068-4

Contents

Preface V
Notation IX

1 Cyclotomic Fields 1
1.1 Introduction 1
1.2 Herbrand-Ribet Theorem 3
1.3 The Cyclotomic Tower 4
1.4 The Main Conjecture 6
1.5 Iwasawa's Theorem 8

2 Local Units 13
2.1 Introduction 13
2.2 Norm and Trace Operators 15
2.3 Interpolating Power Series 17
2.4 The Logarithmic Derivative 20
2.5 An Exact Sequence 26
2.6 The Higher Logarithmic Derivative Maps 28

3 Iwasawa Algebras and *p*-adic Measures 33
3.1 Introduction 33
3.2 p-adic Measures 33
3.3 The Mahler Transform 36
3.4 Restriction of Measures 38
3.5 The Fundamental Exact Sequence 41
3.6 Image of δ_k 43

4 Cyclotomic Units and Iwasawa's Theorem 47
4.1 Introduction 47
4.2 p-adic Zeta Function 47

4.3 Cyclotomic Units 52
4.4 Iwasawa's Theorem 53
4.5 Relation to the Main Conjecture 54
4.6 Another Property of Cyclotomic Units 58
4.7 Global Units 62
4.8 Ideal Class Groups 68

5 Euler Systems 71
5.1 Introduction 71
5.2 Euler Systems 72
5.3 Values of Euler Systems 76
5.4 The Factorization Theorem 77
5.5 An Application of the Cebotarev Theorem 84

6 Main Conjecture 89
6.1 Introduction 89
6.2 The Inductive Argument 89
6.3 Proof of the Main Conjecture 98

7 Appendix 101
