Peter Constantin and Ciprian Foias

Navier-Stokes Equations

The University of Chicago Press
Chicago and London

CONTENTS

INTRODUCTION	vii
CHAPTER	
1. Notation and Preliminary Material	1
2. The Stokes equations. Existence and Uniqueness of Weak Solutions	11
3. Regularity of Solutions of the Stokes Equations	14
4. The Stokes Operator	31
5. The Navier-Stokes Equations	45
6. Inequalities for the Nonlinear Term.	48
7. Stationary solutions to the Navier-Stokes Equations	57
8. Weak Solutions of the Navier-Stokes Equations.	63
9. Strong Solutions	74
10. Further Results Concerning Weak and Strong Solutions	83
11. Vanishing Viscosity Limits	99
12. Analyticity and Backward Uniqueness.	104
13. Exponential Decay of Volume Elements	110
14. Global Lyapunov Exponents. Hausdorff and Fractal Dimension of the Universal Attractor	133
15. Inertial Manifolds	154
Bibliography	185
Index.	189
