## Table of contents

<b>Introduction</b>	<b>1</b>
<b>Chapter 1. — A quick review of Gromov hyperbolic spaces.</b>	<b>5</b>
§1. — Hyperbolic metric spaces.	6
§2. — Hyperbolic groups.	8
§3. — The boundary of a hyperbolic space.	9
§4. — The visual metric on the boundary.	12
§5. — Approximation by trees.	13
§6. — Quasi-geodesics and quasi-isometries.	13
§7. — Classification of isometries.	16
§8. — The polyhedron $P_d(X)$ .	17
Bibliography for Chapter 1.	18
<b>Chapter 2. — Symbolic dynamics.</b>	<b>19</b>
§1. — Bernoulli shifts.	20
§2. — Expansive systems.	22
§3. — Subshifts of finite type.	26
§4. — Systems of finite type and finitely presented systems.	29
§5. — Symbolic dynamics on $\mathbf{N}$ and on $\mathbb{Z}$ .	31
§6. — Sofic systems.	36
Notes and comments on Chapter 2.	40
Bibliography for Chapter 2.	41
<b>Chapter 3. — The boundary of a hyperbolic space as a finitely presented dynamical system.</b>	<b>43</b>
§1. — The cocycles $\varphi$ .	44
§2. — Integration of the cocycles $\varphi$ .	45
§3. — The cocycles associated to Busemann functions.	46
§4. — The gradient lines defined by $\varphi$ .	50
§5. — The point at infinity associated to a cocycle.	52
§6. — Properties of the map $a : \Phi \rightarrow \partial X$ .	55
§7. — Integral cocycles on a hyperbolic graph.	59

§8. — A finite presentation of the boundary of a hyperbolic group.	62
Notes and comments on Chapter 3.	67
Bibliography for Chapter 3.	68
<b>Chapter 4. — Another finite presentation for the action of a hyperbolic group on its boundary.</b>	<b>69</b>
§1. — Convergent sequences.	70
§2. — Convergent quasi-geodesic fields.	74
§3. — Integral fields on a graph.	83
§4. — Another finite presentation of the boundary of a hyperbolic group.	85
Notes and comments on Chapter 4.	89
Bibliography for Chapter 4.	90
<b>Chapter 5. — Trees and hyperbolic boundary.</b>	<b>91</b>
§1. — Trees and projective sequences of sets.	92
§2. — The tree $T_{geo}(X)$ .	93
§3. — The tree $T_{part}(X)$ .	96
§4. — The tree $T_{lex}$ associated to a hyperbolic group.	100
§5. — A remark on the dimension of the hyperbolic boundary.	103
Notes and comments on Chapter 5.	105
Bibliography for Chapter 5.	106
<b>Chapter 6. — Semi-Markovian spaces.</b>	<b>107</b>
§1. — Semi-Markovian spaces.	108
§2. — First examples of semi-Markovian spaces.	110
§3. — Semi-Markovian presentation of polyhedra.	114
Notes and comments on Chapter 6.	116
Bibliography for Chapter 6.	117
<b>Chapter 7. — The boundary of a torsion-free hyperbolic group as a semi-Markovian space.</b>	<b>118</b>
§1. — $N$ -equivalence in the trees $T_{geo}$ and $T_{part}$ .	119
§2. — The boundary of $T_{geo}$ as a semi-Markovian subset.	122
§3. — A semi-Markovian presentation of $\partial\Gamma$ .	126
§4. — The boundary of $T_{part}$ as a semi-Markovian subset.	130
§5. — A finite-to-one semi-Markovian presentation of $\partial\Gamma$ .	131
Notes and comments on Chapter 7.	133
Bibliography for Chapter 7.	134
<b>Index.</b>	<b>135</b>
