

Leo Corry

Modern Algebra and the Rise of Mathematical Structures

Second revised edition

Springer Basel AG

Author's address:

Dr. Leo Corry
The Cohn Institute for the History
and Philosophy of Science and Ideas
Tel Aviv University
Ramat Aviv 69978
Israel

The first edition of this book was published in 1996 in the series *Science Networks – Historical Studies* Vol. 17.

A CIP catalogue record for this book is available from the Library of Congress,
Washington D.C. U.S.A.

Bibliographic information published by Die Deutsche Bibliothek:
Die Deutsche Bibliothek lists this publication in the Deutsche Nationalbibliografie; detailed bibliographic data is available in the Internet at <<http://dnb.ddb.de>>

ISBN 978-3-7643-7002-2

This work is subject to copyright. All rights are reserved, whether the whole or part of the material is concerned, specifically the rights of translation, reprinting, re-use of illustrations, recitation, broadcasting, reproduction on microfilms or in other ways, and storage in data banks. For any kind of use, permission of the copyright owner must be obtained.

Table of Contents

Introduction: Structures in Mathematics	1
Part One: Structures in the Images of Mathematics	13
Chapter 1 Structures in Algebra: Changing Images	19
1.1 Jordan and Hölder: Two Versions of a Theorem	22
1.2 Heinrich Weber: <i>Lehrbuch der Algebra</i>	33
1.3 Bartel L. van der Waerden: <i>Moderne Algebra</i>	43
1.4 Other Textbooks of Algebra in the 1920s	54
Chapter 2 Richard Dedekind: Numbers and Ideals	64
2.1 Lectures on Galois Theory	76
2.1 Algebraic Number Theory	81
2.2.1 Ideal Prime Numbers	81
2.2.2 Theory of Ideals: The First Version (1871)	93
2.2.3 Later Versions	104
2.2.4 The Last Version	110
2.2.5 Additional Contexts	118
2.3 Ideals and <i>Dualgruppen</i>	121
2.4 Dedekind and the Structural Image of Algebra	129
Chapter 3 David Hilbert: Algebra and Axiomatics	137
3.1 Algebraic Invariants	138
3.2 Algebraic Number Theory	147
3.2 Hilbert's Axiomatic Approach	154
3.4 Hilbert and the Structural Image of Algebra	168
3.5 Postulational Analysis in the USA	172

Chapter 4	Concrete and Abstract: Numbers, Polynomials, Rings	183
4.1	Kurt Hensel: Theory of p -adic Numbers.....	184
4.2	Ernst Steinitz: <i>Algebraische Theorie der Körper</i>	192
4.3	Alfred Loewy: <i>Lehrbuch der Algebra</i>	196
4.4	Abraham Fraenkel: Axioms for p -adic Systems	201
4.5	Abraham Fraenkel: Abstract Theory of Rings	207
4.6	Ideals and Abstract Rings after Fraenkel	213
4.7	Polynomials and their Decompositions	214
Chapter 5	Emmy Noether: Ideals and Structures	220
5.1	Early Works	221
5.2	<i>Idealtheorie in Ringbereichen</i>	225
5.3	<i>Abstrakter Aufbau der Idealtheorie</i>	237
5.4	Later Works	244
5.5	Emmy Noether and the Structural Image of Algebra	247
Part Two: Structures in the Body of Mathematics		253
Chapter 6	Oystein Ore: Algebraic Structures	259
6.1	Decomposition Theorems and Algebraic Structures	261
6.2	Non-Commutative Polynomials and Algebraic Structure	263
6.3	Structures and Lattices	267
6.4	Structures in Action	275
6.5	Universal Algebra, Model Theory, Boolean Algebras	279
6.6	Ore's Structures and the Structural Image of Algebra	286

Chapter 7	Nicolas Bourbaki: Theory of <i>Structures</i>	289
7.1	The Myth	291
7.2	Structures and Mathematics	301
7.3	<i>Structures</i> and the Body of Mathematics	311
7.3.1	Set Theory	312
7.3.2	Algebra.....	322
7.3.3	General Topology	325
7.3.4	Commutative Algebra	327
7.4	<i>Structures</i> and the Structural Image of Mathematics	329
Chapter 8	Category Theory: Early Stages	339
8.1	Category Theory: Basic Concepts	340
8.2	Category Theory: A Theory of Structures	344
8.3	Category Theory: Early Works	351
8.4	Category Theory: Some Contributions	364
8.5	Category Theory and Bourbaki	372
Chapter 9	Categories and Images of Mathematics	380
9.1	Categories and the Structural Image of Mathematics	380
9.2	Categories and the Essence of Mathematics	386
9.3	What is Algebra and what has it been in History?	395
Bibliography		399
