Preface	ix
Boundary observability and controllability of linear elastodynamic systems FATIHA ALABAU AND VILMOS KOMORNIK	1
Riblets and drag minimization YOUCEF AMIRAT AND JACQUES SIMON	9
Min-max problems for non-potential operator equations GILES ACHMUTY	19
An infinite dimensional time optimal control problem PIERMARCO CANNARSA AND CARLO SINISTRARI	29
Dirichlet problem for nonlinear first order partial differential equations BERNARD DACOROGNA AND PAOLO MARCELLINI	43
Hidden boundary smoothness for some classes of differential equations on submanifolds MICHEL C. DELFOUR AND JEAN-PAUL ZOLÉSIO	59
Convergence to the asymptotic model for linear thin shells MICHEL C. DELFOUR AND JEAN-PAUL ZOLÉSIO	75
Variational formulation of optimal damping designs F. FAHROO AND K. ITO	95
Local exact boundary controllability of the Navier-Stokes system A. V. FURSIKOV AND O. YU. IMANUVILOV	115
On uniqueness and stability in the Cauchy problem VICTOR ISAKOV	131
Augmented Lagrangian-SQP techniques and their approximations K. KUNISCH AND S. VOLKWEIN	147
Recent progress and open problems in control of multi-link elastic structures JOHN E. LAGNESE	161
Spatio-temporal control in the coefficients of linear hyperbolic equations KONSTANTIN A. LURIE	177
Modified interior distance functions ROMAN A. POLYAK	183

Optimal energy decay rate in a damped Rayleigh beam BOPENG RAO	211
Approximate and exact formability of two-dimensional elastic structures; Complete and incomplete actuator families DAVID L. RUSSELL	231
Displacement derivatives in shape optimization of thin shells JAN SOKOŁOWSKI	247
Carleman estimates, unique continuation and controllability for anisotropic PDE's DANIEL TATARU	267
Navier-Stokes equations in thin spherical domains R. TEMAM AND M. ZIANE	281
The algebraic Riccati equation with unbounded control operator: The abstract hyperbolic case revisited R. TRIGGIANI	315
One-parameter families of solutions to a class of PDE optimal control problems M. I. ZELIKIN	339
