

## Contents

Preface	ix
Introduction to Gröbner bases DAVID A. COX	1
Introduction to resultants BERND STURMFELS	25
Numerical methods for solving polynomial equations DINESH MANOCHA	41
Applications to computer aided geometric design THOMAS W. SEDERBERG	69
Combinatorial homotopy of simplicial complexes and complex information systems XENIA H. KRAMER AND REINHARD C. LAUBENBACHER	93
Applications to integer programming REKHA R. THOMAS	119
Applications to coding theory JOHN B. LITTLE	143
Index	169
