Contents

1 Introduction **1**
- 1.1 Basic Evolutionary Processes . . . 2
- 1.2 EV: A Simple Evolutionary System . . . 3
- 1.3 EV on a Simple Fitness Landscape . . . 6
- 1.4 EV on a More Complex Fitness Landscape . . . 15
- 1.5 Evolutionary Systems as Problem Solvers . . . 19
- 1.6 Exercises . . . 21

2 A Historical Perspective **23**
- 2.1 Early Algorithmic Views . . . 23
- 2.2 The Catalytic 1960s . . . 24
- 2.3 The Explorative 1970s . . . 25
  - 2.3.1 Evolutionary Programming . . . 25
  - 2.3.2 Evolution Strategies . . . 25
  - 2.3.3 Genetic Algorithms . . . 26
- 2.4 The Exploitative 1980s . . . 27
  - 2.4.1 Optimization Applications . . . 27
  - 2.4.2 Other EA Applications . . . 28
  - 2.4.3 Summary . . . 28
- 2.5 The Unifying 1990s . . . 29
- 2.6 The Twenty-first Century: Mature Expansion . . . 29
- 2.7 Summary . . . 31

3 Canonical Evolutionary Algorithms **33**
- 3.1 Introduction . . . 33
- 3.2 EV(m,n) . . . 33
- 3.3 Evolutionary Programming . . . 34
- 3.4 Evolution Strategies . . . 36
- 3.5 Genetic Algorithms . . . 40
  - 3.5.1 Multi-parent Reproduction . . . 41
  - 3.5.2 Universal Genetic Codes . . . 43
- 3.6 Summary . . . 47

4 A Unified View of Simple EAs **49**
4.1 A Common Framework . . . 49
4.2 Population Size . . . 50
4.2.1 Parent Population Size m . . . 50
4.2.2 Offspring Population Size n . . . 52
4.3 Selection . . . 54
4.3.1 Choosing Selection Mechanisms . . . 58
4.3.2 Survival Selection: A Special Case . . . 59
4.3.3 Selection Summary . . . 60
4.4 Reproductive Mechanisms . . . 61
4.4.1 Mutation . . . 61
4.4.2 Recombination . . . 63
4.4.3 Crossover or Mutation? . . . 66
4.4.4 Representation Issues . . . 67
4.4.5 Choosing Effective Reproductive Mechanisms . . . 68
4.5 Summary . . . 69

5 Evolutionary Algorithms as Problem Solvers **71**
5.1 Simple EAs as Parallel Adaptive Search . . . 71
5.1.1 Representation . . . 72
5.1.1.1 Fixed-Length Linear Objects . . . 73
5.1.1.2 Nonlinear Objects . . . 73
5.1.1.3 Variable-Length Objects . . . 74
5.1.1.4 Nonlinear, Variable-Length Objects . . . 75
5.1.2 Reproductive Operators . . . 75
5.1.3 Objective Fitness Evaluation . . . 76
5.1.4 Population Sizes and Dynamics . . . 77
5.1.5 Convergence and Stopping Criteria . . . 78
5.1.6 Returning an Answer . . . 79
5.1.7 Summary . . . 80
5.2 EA-based Optimization . . . 80
5.2.1 OPT-EAs . . . 80
5.2.1.1 Fitness Scaling . . . 81
5.2.1.2 Convergence and Elitism . . . 82
5.2.1.3 Summary . . . 83
5.2.2 Parameter Optimization . . . 83
5.2.2.1 Phenotypic Representations and Operators . . . 84
5.2.2.2 Genotypic Representations and Operators . . . 84
5.2.2.3 Choosing Representations and Operators . . . 85
5.2.2.4 Real-Valued Parameter Optimization . . . 85
5.2.2.5 Integer-Valued Parameter Optimization . . . 93
5.2.2.6 Symbolic Parameter Optimization . . . 95
5.2.2.7 Non-homogeneous Parameter Optimization . . . 97
5.2.3 Constrained Optimization . . . 97
5.2.4 Data Structure Optimization . . . 100

5.2.4.1 Variable-Length Data Structures . . . 102
5.2.5 Multi-objective Optimization . . . 103
5.2.6 Summary . . . 104
5.3 EA-Based Search . . . 105
5.4 EA-Based Machine Learning . . . 107
5.5 EA-Based Automated Programming . . . 109
5.5.1 Representing Programs . . . 109
5.5.2 Evaluating Programs . . . 110
5.5.3 Summary . . . 112
5.6 EA-Based Adaptation . . . 112
5.7 Summary . . . 113

6 Evolutionary Computation Theory 115
6.1 Introduction . . . 115
6.2 Analyzing EA Dynamics . . . 117
6.3 Selection-Only Models . . . 120
6.3.1 Non-overlapping-Generation Models . . . 120
6.3.1.1 Uniform (Neutral) Selection . . . 121
6.3.1.2 Fitness-Biased Selection . . . 123
6.3.1.3 Non-overlapping-Generation Models with $n \neq m$ . . . 132
6.3.2 Overlapping-Generation Models . . . 134
6.3.2.1 Uniform (Neutral) Selection . . . 135
6.3.2.2 Fitness-Biased Selection . . . 136
6.3.3 Selection in Standard EAs . . . 137
6.3.4 Reducing Selection Sampling Variance . . . 138
6.3.5 Selection Summary . . . 140
6.4 Reproduction-Only Models . . . 141
6.4.1 Non-overlapping-Generation Models . . . 141
6.4.1.1 Reproduction for Fixed-Length Discrete Linear Genomes . . . 143
6.4.1.2 Reproduction for Other Genome Types . . . 152
6.4.2 Overlapping-Generation Models . . . 158
6.4.3 Reproduction Summary . . . 159
6.5 Selection and Reproduction Interactions . . . 160
6.5.1 Evolvability and Price's Theorem . . . 160
6.5.2 Selection and Discrete Recombination . . . 162
6.5.2.1 Discrete Recombination from a Schema Perspective . . . 162
6.5.2.2 Crossover-Induced Diversity . . . 163
6.5.2.3 Crossover-Induced Fitness Improvements . . . 166
6.5.3 Selection and Other Recombination Operators . . . 169
6.5.4 Selection and Mutation . . . 171
6.5.4.1 Mutation from a Schema Perspective . . . 172
6.5.4.2 Mutation-Induced Diversity . . . 172
6.5.4.3 Mutation-Induced Fitness Improvements . . . 175
6.5.5 Selection and Other Mutation Operators . . . 177
6.5.6 Selection and Multiple Reproductive Operators . . . 177

6.5.7 Selection, Reproduction, and Population Size . . . 180
6.5.7.1 Non-overlapping-Generation Models . . . 181
6.5.7.2 Overlapping-Generation Models . . . 183
6.5.8 Summary . . . 185
6.6 Representation . . . 185
6.6.1 Capturing Important Application Features . . . 185
6.6.2 Defining Effective Reproduction Operators . . . 186
6.6.2.1 Effective Mutation Operators . . . 187
6.6.2.2 Effective Recombination Operators . . . 187
6.7 Landscape Analysis . . . 188
6.8 Models of Canonical EAs . . . 189
6.8.1 Infinite Population Models for Simple GAs . . . 189
6.8.2 Expected Value Models of Simple GAs . . . 191
6.8.2.1 GA Schema Theory . . . 192
6.8.2.2 Summary . . . 199
6.8.3 Markov Models . . . 199
6.8.3.1 Markov Models of Finite Population EAs . . . 200
6.8.3.2 Markov Models of Simple GAs . . . 201
6.8.3.3 Summary . . . 203
6.8.4 Statistical Mechanics Models . . . 203
6.8.5 Summary . . . 205
6.9 Application-Oriented Theories . . . 205
6.9.1 Optimization-Oriented Theories . . . 205
6.9.1.1 Convergence and Rates of Convergence . . . 206
6.9.1.2 ESs and Real-Valued Parameter Optimization Problems . . . 206
6.9.1.3 Simple EAs and Discrete Optimization Problems . . . 207
6.9.1.4 Optimizing with Genetic Algorithms . . . 208
6.10 Summary . . . 209

7 Advanced EC Topics 211
7.1 Self-adapting EAs . . . 211
7.1.1 Adaptation at EA Design Time . . . 212
7.1.2 Adaptation over Multiple EA Runs . . . 212
7.1.3 Adaptation during an EA Run . . . 213
7.1.4 Summary . . . 213
7.2 Dynamic Landscapes . . . 213
7.2.1 Standard EAs on Dynamic Landscapes . . . 214
7.2.2 Modified EAs for Dynamic Landscapes . . . 215
7.2.3 Categorizing Dynamic Landscapes . . . 216
7.2.4 The Importance of the Rate of Change . . . 216
7.2.5 The Importance of Diversity . . . 217
7.2.6 Summary . . . 219
7.3 Exploiting Parallelism . . . 219
7.3.1 Coarse-Grained Parallel EAs . . . 220
7.3.2 Fine-Grained Models . . . 220

7.3.3 Summary . . . 221
7.4 Evolving Executable Objects . . . 221
7.4.1 Representation of Behaviors . . . 221
7.4.2 Summary . . . 223
7.5 Multi-objective EAs . . . 223
7.6 Hybrid EAs . . . 224
7.7 Biologically Inspired Extensions . . . 225
7.7.1 Non-random Mating and Speciation . . . 225
7.7.2 Coevolutionary Systems . . . 226
7.7.2.1 CoEC Architectures . . . 227
7.7.2.2 CoEC Dynamics . . . 227
7.7.3 Generative Representations and Morphogenesis . . . 228
7.7.4 Inclusion of Lamarckian Properties . . . 229
7.7.5 Agent-Oriented Models . . . 229
7.7.6 Summary . . . 230
7.8 Summary . . . 230

8 The Road Ahead 231
8.1 Modeling General Evolutionary Systems . . . 231
8.2 More Unification . . . 232
8.3 Summary . . . 232

Appendix A: Source Code Overview 233
A.1 EC1: A Very Simple EC System . . . 233
A.1.1 EC1 Code Structure . . . 234
A.1.2 EC1 Parameters . . . 235
A.2 EC2: A More Interesting EC System . . . 236
A.3 EC3: A More Flexible EC System . . . 237
A.4 EC4: An EC Research System . . . 240
