

Contents

Preface	ix
On real involutions and ramifications of real valuations M. E. ALONSO AND M. P. VÉLEZ	1
Deciding positivity of real polynomials EBERHARD BECKER, VICTORIA POWERS, AND THORSTEN WÖRMANN	19
Radial vector fields and the Poincaré-Hopf theorem JEAN-PAUL BRASSELET	25
A generalization of the Arnold-Viro inequalities for real singular algebraic curves SERGEY FINASHIN	31
Floppy curves, with applications to real algebraic curves PATRICK GILMER	39
Towards an abstract description of the space of real places DANIELLE GONDARD AND MURRAY MARSHALL	77
A special quantifier elimination algorithm for Pham systems LAUREANO GONZALEZ-VEGA	115
A look at biseparating maps from an algebraic point of view MELVIN HENRIKSEN AND FRANK A. SMITH	135
Real Teichmüller spaces and moduli of real algebraic curves J. HUISMAN	145
Correction to “A real algebraic vector bundle is strongly algebraic whenever its total space is affine” J. HUISMAN	179
The exponential rank of nonarchimedean exponential fields FRANZ-VIKTOR KUHLMANN AND SALMA KUHLMANN	181
Subanalytic and semialgebraic realisations of abstract stratified sets LAURENT NOIREL AND DAVID TROTMAN	203
On the vector space defect for valued field extensions JACK OHM	209

On the classification of decomposable 7-th degree curves GRIGORII M. POLOTOVSKII	219
The complex spectrum of a ring M. J. DE LA PUENTE	235
Some concrete aspects of Hilbert's 17th problem BRUCE REZNICK	251
Semialgebraic singularity theory MASAHIRO SHIOTA	273
