

Contents

Part A. Elementary Theory

<i>Chapter I. Preliminaries</i>	3
1. The Language of Set Theory	3
2. The Zermelo-Fraenkel Axioms	4
3. Elementary Theory of ZFC	6
4. Ordinal Numbers	12
5. Cardinal Numbers	13
6. Closed Unbounded Sets	20
7. The Collapsing Lemma	22
8. Metamathematics of Set Theory	24
9. The Language \mathcal{L}_V	31
10. Definability	44
11. Kripke-Platek Set Theory. Admissible Sets	48
 <i>Chapter II. The Constructible Universe</i>	 56
1. Definition of the Constructible Universe	57
2. The Constructible Hierarchy. The Axiom of Constructibility	63
3. The Axiom of Choice in L	71
4. Constructibility and Relative Consistency Results	77
5. The Condensation Lemma. The GCH in L	78
6. Σ_n Skolem Functions	85
7. Admissible Ordinals	95
 <i>Chapter III. ω_1-Trees in L</i>	 108
1. The Souslin Problem. ω_1 -Trees. Aronszajn Trees	108
2. The Kurepa Hypothesis	118
3. Some Combinatorial Principles Related to the Previous Constructions	122

<i>Chapter IV.</i> κ^+ -Trees in L and the Fine Structure Theory	137
1. κ^+ -Trees	137
2. κ^+ -Souslin Trees	138
3. κ^+ -Kurepa Trees	149
4. The Fine Structure Theory	152
5. The Combinatorial Principle \square_κ	158
 <i>Chapter V.</i> The Story of $0^\#$	169
1. A Brief Review of Large Cardinals	169
2. L -Indiscernibles and $0^\#$	176
3. Definability of $0^\#$	185
4. $0^\#$ and Elementary Embeddings	188
5. The Covering Lemma	196
 Part B. Advanced Theory	
 <i>Chapter VI.</i> The Fine Structure Theory	225
1. Rudimentary Functions	225
2. The Jensen Hierarchy of Constructible Sets	251
3. The Σ_1 -Skolem Function	258
4. The Σ_n -Projectum	266
5. Standard Codes	274
6. An Application: A Global \square -Principle	284
 <i>Chapter VII.</i> Trees and Large Cardinals in L	303
1. Weakly Compact Cardinals and κ -Souslin Trees	303
2. Ineffable Cardinals and κ -Kurepa Trees	312
3. Generalised Kurepa Families and the Principles $\diamond_{\kappa,\lambda}^+$	319
 <i>Chapter VIII.</i> Morasses and the Cardinal Transfer Theorem	332
1. Cardinal Transfer Theorems	332
2. Gap-1 Morasses	338
3. The Gap-2 Cardinal Transfer Theorem	359
4. Simplified Morasses	369
5. Gap- n Morasses	378
 <i>Chapter IX.</i> Silver Machines	383
1. Silver Machines	383
2. The Combinatorial Principle \square	391

Remarks and Historical Notes	409
Bibliography	415
Glossary of Notation	419
Index	422
