Table of Contents

Preface	vii
Chapter 0. Introduction	
§ 1. Overview	1
Part I. Integral Operators	7
Chapter 1. Basic integral operators	
§ 2. Linear integral operator	8
§ 3. Additive family of operators	10
§ 4. The case possessing a density ..	24
§ 5. Operator generated by z^a ..	27
Chapter 2. Properties of integral operators	
§ 6. Relations to fractional calculus	33
§ 7. Relations to integration operator	40
§ 8. Generalizations	47
§ 9. Examples	56
Chapter 3. Applications	
§ 10. Product of operators	63
§ 11. Analytic prolongation	75
§ 12. Functional equations	81

Part II. Distortion Theorems 87

Chapter 4. Distortions on univalent functions

§ 13. Maximum modulus	88
§ 14. Classes related to univalent functions	100
§ 15. Univalent functions	105
§ 16. Particular subclasses	120
§ 17. Mean distortions	137

Chapter 5. Distortions on real part

§ 18. Real part of analytic functions	143
§ 19. Several remarks	156
§ 20. Bounds on real part	164
§ 21. Distortions by a differential operator	168
§ 22. Generalizations to higher order	181
§ 23. Application of subordination	191

Chapter 6. Distortions on miscellaneous functionals

§ 24. Oscillation	196
§ 25. Length and area	212
§ 26. Evaluation of bounds	224
§ 27. Range of functions in Carathéodory class	230
§ 28. A general operator on Carathéodory class	241
§ 29. Mean distortions of fractional integral	263
§ 30. Angular derivative	276
