<i>Preface</i>	<i>page ix</i>
<b>Introduction to analysis of variance</b>	
What is analysis of variance?	1
How to read and write statistical models	2
General principles of ANOVA	7
Assumptions of ANOVA	14
How to distinguish between fixed and random factors	16
Nested and crossed factors, and the concept of replication	21
Uses of blocking, split plots and repeated measures	25
Uses of covariates	29
How <i>F</i> -ratios are constructed	35
Use of <i>post hoc</i> pooling	38
Use of quasi <i>F</i> -ratios	40
<b>Introduction to model structures</b>	
Notation	43
Allocation tables	43
Examples	46
Worked example 1: Nested analysis of variance	47
Worked example 2: Cross-factored analysis of variance	49
Worked example 3: Split-plot, pooling and covariate analysis	51
Key to types of statistical models	57
How to describe a given design with a statistical model	58

<b>1</b>	<b>One-factor designs</b>	<b>61</b>
1.1	One-factor model	62
<b>2</b>	<b>Nested designs</b>	<b>67</b>
2.1	Two-factor nested model	68
2.2	Three-factor nested model	72
<b>3</b>	<b>Fully replicated factorial designs</b>	<b>76</b>
3.1	Two-factor fully cross-factored model	78
3.2	Three-factor fully cross-factored model	86
3.3	Cross-factored with nesting model	98
3.4	Nested cross-factored model	109
<b>4</b>	<b>Randomised-block designs</b>	<b>115</b>
4.1	One-factor randomised-block model	121
4.2	Two-factor randomised-block model	128
4.3	Three-factor randomised-block model	134
<b>5</b>	<b>Split-plot designs</b>	<b>141</b>
5.1	Two-factor split-plot model (i)	146
5.2	Three-factor split-plot model (i)	150
5.3	Three-factor split-plot model (ii)	154
5.4	Split-split-plot model (i)	158
5.5	Split-split-plot model (ii)	163
5.6	Two-factor split-plot model (ii)	167
5.7	Three-factor split-plot model (iii)	170
5.8	Split-plot model with nesting	173
5.9	Three-factor split-plot model (iv)	176
<b>6</b>	<b>Repeated-measures designs</b>	<b>179</b>
6.1	One-factor repeated-measures model	187
6.2	Two-factor repeated-measures model	190
6.3	Two-factor model with repeated measures on one cross factor	195
6.4	Three-factor model with repeated measures on nested cross factors	200
6.5	Three-factor model with repeated measures on two cross factors	205
6.6	Nested model with repeated measures on a cross factor	214
6.7	Three-factor model with repeated measures on one factor	220

vii

<b>7</b>	<b>Unreplicated designs</b>	<b>229</b>
7.1	Two-factor cross factored unreplicated model	230
7.2	Three-factor cross factored unreplicated model	232
	<b>Further Topics</b>	<b>237</b>
	Balanced and unbalanced designs	237
	Restricted and unrestricted mixed models	242
	Magnitude of effect	244
	A priori planned contrasts and <i>post hoc</i> unplanned comparisons	245
	<b>Choosing experimental designs</b>	<b>248</b>
	Statistical power	248
	Evaluating alternative designs	250
	<b>How to request models in a statistics package</b>	<b>258</b>
	<b>Best practice in presentation of the design</b>	<b>260</b>
	<b>Troubleshooting problems during analysis</b>	<b>264</b>
	<i>Glossary</i>	271
	<i>References</i>	281
	<i>Index of all ANOVA models with up to three factors</i>	284
	<i>Index</i>	286
	<i>Categories of model</i>	288
