Preface	ix
Part 1. Spline Functions	
Introduction and Summary	3
Radial Extensions of Vertex Data <i>L. P. Bos and D. Holland</i>	5
The Use of Splines in the Numerical Solution of Differential and Volterra Integral Equations <i>Hermann Brunner</i>	15
On Best Error Bounds for Deficient Splines <i>François Dubeau and Jean Savoie</i>	33
Optimal Error Bounds for Spline Interpolation on a Uniform Partition <i>François Dubeau and Jean Savoie</i>	41
Modelization of Flexible Objects Using Constrained Optimization and B-Spline Surfaces <i>Jean-Pierre Dussault and Nicolas Pfister</i>	51
New Control Polygons for Polynomial Curves <i>J. C. Fiorot and P. Jeannin</i>	65
Splines in Approximation and Differential Operators: (m, ℓ, s) Interpolating- Spline <i>A. Le Méhauté and A. Bouhamidi</i>	77
New Families of B-Splines on Uniform Meshes of the Plane <i>Paul Sablonnière</i>	89
Part 2. Theory of Wavelets	
Introduction and Summary	103
Analysis of Hermite-Interpolatory Subdivision Schemes <i>Nira Dyn and David Levin</i>	105
Some Directional Microlocal Classes Defined Using Wavelet Transforms <i>Matthias Holschneider</i>	115

Nonseparable Biorthogonal Wavelet Bases of $L^2(\mathbb{R}^n)$ <i>Abderrazek Karoui and Rémi Vaillancourt</i>	135
Local Bases: Theory and Applications <i>Jelena Kovačević and Riccardo Bernardini</i>	153
On the L^p -Lipschitz Exponents of the Scaling Functions <i>Ka-Sing Lau and Mang-Fai Ma</i>	181
Robust Speech and Speaker Recognition Using Instantaneous Frequencies and Amplitudes Obtained with Wavelet-Derived Synchrosqueezing Measures <i>Stéphane H. Maes</i>	193
Extensions of the Heisenberg Group and Wavelet Analysis in the Plane <i>Eckart Schulz and Keith F. Taylor</i>	217
Part 3. Wavelets in Physics	
Introduction and Summary	229
Coherent States and Quantization <i>S. Twareque Ali</i>	233
Wavelets in Molecular and Condensed-Matter Physics <i>J.-P. Antoine</i>	245
Wavelets in Atomic Physics <i>J.-P. Antoine, Ph. Antoine, and B. Piraux</i>	261
The Wavelet ε -Expansion and Hausdorff Dimension <i>G. Battle</i>	277
Modelling the Coupling Between Small and Large Scales in the Kuramoto- Sivashinsky Equation <i>J. Elezgaray, G. Berkooz, and P. Holmes</i>	293
Continuous Wavelet Transform Analysis of One Dimensional Quantum Ground States <i>C. R. Handy and R. Murenzi</i>	303
Oscillating Singularities and Fractal Functions <i>A. Arneodo, E. Bacry, S. Jaffard, and J. F. Muzy</i>	315
Part 4. Splines and Wavelets in Statistics	
Introduction and Summary	333
Wavelet Estimators for Change-Point Regression Models <i>A. Antoniadis</i>	335
Wavelet Thresholding for Non (Necessarily) Gaussian Noise: A Preliminary Report <i>R. Averkamp and C. Houdré</i>	347

Deslauriers-Dubuc: Ten Years After <i>D. L. Donoho and Thomas P. Y. Yu</i>	355
Some Theory for L -Spline Smoothing <i>J. O. Ramsay and N. Heckman</i>	371
Spectral Representation and Estimation for Locally Stationary Wavelet Processes <i>R. von Sachs, G. P. Nason, and G. Kroisandt</i>	381
