Lakshmikantham, V.
Dynamic systems on measure chains / by V. Lakshmikantham, S. Sivasundaram, B. Kaymakcalan.
p. cm. -- (Mathematics and its applications ; v. 370)
Includes bibliographical references and index.

1. Differentiable dynamical systems. 2. Difference equations. I. Sivasundaram, S. II. Kaymakcalan, B. III. Title. IV. Series: Mathematics and its applications (Kluwer Academic Publishers) ; v. 370.

# TABLE OF CONTENTS

**Preface** vii

**Chapter 1** 1
1.0 Introduction 1
1.1 Measure chains and time scales 3
1.2 Differentiation 11
1.3 Mean value theorem and consequences 19
1.4 Integral and antiderivative 28
1.5 Notes 37

**Chapter 2** 39
2.0 Introduction 39
2.1 Local existence and uniqueness 40
2.2 Dynamic inequalities 46
2.3 Existence of extremal solutions 52
2.4 Comparison results 54
2.5 Linear variation of parameters 59
2.6 Continuous dependence 62

2.7 Nonlinear variation of parameters 68
2.8 Global existence and stability 75
2.9 Notes 79

**Chapter 3** 81
3.0 Introduction 81
3.1 Comparison theorems 82
3.2 Stability criteria 90
3.3 A technique in stability theory 99
3.4 Stability of conditionally invariant sets 102
3.5 Stability in terms of two measures 121
3.6 Vector Lyapunov functions and practical stability 131
3.7 Notes 140

**Chapter 4** 143
4.0 Introduction 143
4.1 Monotone iterative technique 144
4.2 Method of quasilinearization 162
4.3 Monotone flows and stationary points 175
4.4 Invariant manifolds 189
4.5 Practical stability of large-scale uncertain dynamic systems 200
4.6 Boundary value problems 211
4.7 Sturmian theory 221
4.8 Convexity of solutions relative to the initial data 258
4.9 Invariance principle 264
4.10 Notes 273
