Library of Congress Cataloging-in-Publication Data

Elaydi, Saber, 1943–

An introduction to difference equations / Saber N. Elaydi. — 2nd ed.

p. cm. — (Undergraduate texts in mathematics)

Includes bibliographical references and index.

ISBN 978-1-4757-3112-5

ISBN 978-1-4757-3110-1 (eBook)

DOI 10.1007/978-1-4757-3110-1

1. Difference equations. I. Title. II. Series.

QA431.E43 1999

515'.625—dc21

99-13256

Printed on acid-free paper.

Contents

Preface to the Second Edition	vii
Preface to the First Edition	ix
List of Symbols	xvii
1 Dynamics of First-Order Difference Equations	1
1.1 Introduction	1
1.2 Linear First-Order Difference Equations	2
1.2.1 Important Special Cases	4
1.3 Equilibrium Points	8
1.3.1 The Stair Step (Cobweb) Diagrams	14
1.3.2 The Cobweb Theorem of Economics	18
1.4 Criterion for Asymptotic Stability of Equilibrium Points	22
1.5 Periodic Points and Cycles	29
1.6 The Logistic Equation and Bifurcation	35
1.6.1 Equilibrium Points	35
1.6.2 2-Cycles	36
1.6.3 2 ² -Cycles	39
1.6.4 The Bifurcation Diagram	40
Appendix A Global Stability	44
Appendix B Carvalho's Lemma	45
2 Linear Difference Equations of Higher Order	47
2.1 Difference Calculus	47
2.1.1 The Power Shift	49

2.1.2	Factorial Polynomials	49
2.1.3	The Antidifference Operator	51
2.2	General Theory of Linear Difference Equations	54
2.3	Linear Homogeneous Equations with Constant Coefficients	63
2.4	Linear Nonhomogeneous Equations: Method of Undetermined Coefficients	70
2.4.1	The Method of Variation of Constants (Parameters)	76
2.5	Limiting Behavior of Solutions	78
2.6	Nonlinear Equations Transformable to Linear Equations	85
2.7	Applications	91
2.7.1	Propagation of Annual Plants	91
2.7.2	Gambler's Ruin	94
2.7.3	National Income	96
2.7.4	The Transmission of Information	97
3	Systems of Difference Equations	105
3.1	Autonomous (Time-Invariant) Systems	105
3.1.1	The Discrete Analogue of the Putzer Algorithm	106
3.1.2	The Development of the Algorithm for A^n	107
3.2	The Basic Theory	112
3.3	The Jordan Form: Autonomous (Time-Invariant) Systems Revisited	120
3.4	Linear Periodic Systems	136
3.5	Applications	141
3.5.1	Markov Chains	141
3.5.2	Regular Markov Chains	142
3.5.3	Absorbing Markov Chains	144
3.5.4	A Trade Model	147
3.5.5	The Heat Equation	149
4	Stability Theory	154
4.1	Preliminaries	155
4.2	Scalar Equations	163
4.3	Stability of Linear Systems	166
4.4	Phase Space Analysis	174
4.5	Liapunov's Direct, or Second, Method	184
4.6	Stability by Linear Approximation	198
4.7	Hartman–Grobman Theorem	206
4.8	Applications	207
4.8.1	One Species with Two Age Classes	207
4.8.2	Host–Parasitoid Systems	210
4.8.3	The Nicholson–Bailey Model	211
5	The Z-Transform Method	215
5.1	Definitions and Examples	215

5.1.1	Properties of the Z-Transform	219
5.2	The Inverse Z-Transform and Solutions of Difference Equations	223
5.2.1	The Power Series Method	224
5.2.2	The Partial Fractions Method	225
5.2.3	The Inversion Integral Method	228
5.3	Volterra Difference Equations of Convolution Type: The Scalar Case	232
5.4	Explicit Criteria for Stability of Volterra Equations	236
5.5	Volterra Systems	240
5.6	A Variation of Constants Formula	245
5.7	The Z-Transform Versus the Laplace Transform	248
6	Control Theory	251
6.1	Introduction	251
6.1.1	Discrete Equivalents for Continuous Systems	253
6.2	Controllability	254
6.2.1	Controllability Canonical Forms	261
6.3	Observability	267
6.3.1	Observability Canonical Forms	273
6.4	Stabilization by State Feedback (Design via Pole Placement)	277
6.4.1	Stabilization of Nonlinear Systems by Feedback	284
6.5	Observers	287
6.5.1	Eigenvalue Separation Theorem	288
7	Oscillation Theory	296
7.1	Three-Term Difference Equations	296
7.2	Nonlinear Difference Equations	302
7.3	Self-Adjoint Second-Order Equations	308
8	Asymptotic Behavior of Difference Equations	315
8.1	Tools of Approximation	315
8.2	Poincaré's Theorem	320
8.2.1	Infinite Products and Perron's Example	324
8.3	Asymptotically Diagonal Systems	330
8.4	High-Order Difference Equations	338
8.5	Second-Order Difference Equations	346
8.5.1	A Generalization of the Poincaré–Perron Theorem	349
8.6	Birkhoff's Theorem	354
8.7	Nonlinear Difference Equations	359
9	Applications to Continued Fractions and Orthogonal Polynomials	365
9.1	Continued Fractions: Fundamental Recurrence Formula	365
9.2	Convergence of Continued Fractions	368

9.3	Continued Fractions and Infinite Series	375
9.4	Classical Orthogonal Polynomials	379
9.5	The Fundamental Recurrence Formula for Orthogonal Polynomials	383
9.6	Minimal Solutions, Continued Fractions, and Orthogonal Polynomials	387
	Answers to Selected Problems	395
	Maple Programs	409
	Appendix C Classical Orthogonal Polynomials	413
	Appendix D Identities and Formulas	413
	Bibliography	415
	Index	421
