S. Brendle, M. Campiti, T. Hahn, G. Metafuno  
G. Nickel, D. Pallara, C. Perazzoli, A. Rhandi  
S. Romanelli, and R. Schnaubelt

# Contents

|   |             |
|---|-------------|
| <b>Preface</b> .....                                      | <b>vii</b>  |
| <b>Prelude</b> .....                                      | <b>xvii</b> |
| <b>I. Linear Dynamical Systems</b> .....                  | <b>1</b>    |
| 1. Cauchy's Functional Equation .....                     | 2           |
| 2. Finite-Dimensional Systems: Matrix Semigroups .....    | 6           |
| 3. Uniformly Continuous Operator Semigroups .....         | 14          |
| 4. More Semigroups .....                                  | 24          |
| a. Multiplication Semigroups on $C_0(\Omega)$ .....       | 24          |
| b. Multiplication Semigroups on $L^p(\Omega, \mu)$ .....  | 30          |
| c. Translation Semigroups .....                           | 33          |
| 5. Strongly Continuous Semigroups .....                   | 36          |
| a. Basic Properties .....                                 | 37          |
| b. Standard Constructions .....                           | 42          |
| Notes .....   | 46          |
| <b>II. Semigroups, Generators, and Resolvents</b> .....   | <b>47</b>   |
| 1. Generators of Semigroups and Their Resolvents .....    | 48          |
| 2. Examples Revisited .....                               | 59          |
| a. Standard Constructions .....                           | 59          |
| b. Standard Examples .....                                | 65          |
| 3. Hille–Yosida Generation Theorems .....                 | 70          |
| a. Generation of Groups and Semigroups .....              | 71          |
| b. Dissipative Operators and Contraction Semigroups ..... | 82          |
| c. More Examples .....                                    | 89          |

|             |   |            |
|-------------|---|------------|
| 4.          | Special Classes of Semigroups .....                         | 96         |
| a.          | Analytic Semigroups .....                                   | 96         |
| b.          | Differentiable Semigroups .....                             | 109        |
| c.          | Eventually Norm-Continuous Semigroups .....                 | 112        |
| d.          | Eventually Compact Semigroups .....                         | 117        |
| e.          | Examples .....  | 120        |
| 5.          | Interpolation and Extrapolation Spaces for Semigroups ..... | 123        |
|             | <i>Simon Brendle</i>  |            |
| a.          | Sobolev Towers .....  | 124        |
| b.          | Favard and Abstract Hölder Spaces .....                     | 129        |
| c.          | Fractional Powers .....                                     | 137        |
| 6.          | Well-Posedness for Evolution Equations .....                | 145        |
|             | Notes .....   | 154        |
| <b>III.</b> | <b>Perturbation and Approximation of Semigroups .....</b>   | <b>157</b> |
| 1.          | Bounded Perturbations .....                                 | 157        |
| 2.          | Perturbations of Contractive and Analytic Semigroups .....  | 169        |
| 3.          | More Perturbations .....                                    | 182        |
| a.          | The Perturbation Theorem of Desch–Schappacher .....         | 182        |
| b.          | Comparison of Semigroups .....                              | 192        |
| c.          | The Perturbation Theorem of Miyadera–Voigt .....            | 195        |
| d.          | Additive Versus Multiplicative Perturbations .....          | 201        |
| 4.          | Trotter–Kato Approximation Theorems .....                   | 205        |
| a.          | A Technical Tool: Pseudoresolvents .....                    | 206        |
| b.          | The Approximation Theorems .....                            | 209        |
| c.          | Examples .....  | 214        |
| 5.          | Approximation Formulas .....                                | 219        |
| a.          | Chernoff Product Formula .....                              | 219        |
| b.          | Inversion Formulas .....                                    | 231        |
|             | Notes .....   | 236        |
| <b>IV.</b>  | <b>Spectral Theory for Semigroups and Generators .....</b>  | <b>238</b> |
| 1.          | Spectral Theory for Closed Operators .....                  | 239        |
| 2.          | Spectrum of Semigroups and Generators .....                 | 250        |
| a.          | Basic Theory .....  | 250        |
| b.          | Spectrum of Induced Semigroups .....                        | 259        |
| c.          | Spectrum of Periodic Semigroups .....                       | 266        |
| 3.          | Spectral Mapping Theorems .....                             | 270        |
| a.          | Examples and Counterexamples .....                          | 270        |
| b.          | Spectral Mapping Theorems for Semigroups .....              | 275        |
| c.          | Weak Spectral Mapping Theorem for Bounded Groups .....      | 283        |
| 4.          | Spectral Theory and Perturbation .....                      | 289        |
|             | Notes .....   | 293        |
| <b>V.</b>   | <b>Asymptotics of Semigroups .....</b>                      | <b>295</b> |
| 1.          | Stability and Hyperbolicity for Semigroups .....            | 296        |
| a.          | Stability Concepts .....                                    | 296        |
| b.          | Characterization of Uniform Exponential Stability .....     | 299        |
| c.          | Hyperbolic Decompositions .....                             | 305        |

|            |  |            |
|------------|--|------------|
| 2.         | Compact Semigroups .....   | 308        |
| a.         | General Semigroups .....   | 308        |
| b.         | Weakly Compact Semigroups .....                                  | 312        |
| c.         | Strongly Compact Semigroups .....                                | 317        |
| 3.         | Eventually Compact and Quasi-compact Semigroups .....            | 329        |
| 4.         | Mean Ergodic Semigroups .....                                    | 337        |
|            | Notes .....  | 345        |
| <b>VI.</b> | <b>Semigroups Everywhere .....</b>                               | <b>347</b> |
| 1.         | Semigroups for Population Equations .....                        | 348        |
| a.         | Semigroup Method for the Cell Equation .....                     | 349        |
| b.         | Intermezzo on Positive Semigroups .....                          | 353        |
| c.         | Asymptotics for the Cell Equation .....                          | 358        |
|            | Notes .....  | 361        |
| 2.         | Semigroups for the Transport Equation .....                      | 361        |
| a.         | Solution Semigroup for the Reactor Problem .....                 | 361        |
| b.         | Spectral and Asymptotic Behavior .....                           | 364        |
|            | Notes .....  | 367        |
| 3.         | Semigroups for Second-Order Cauchy Problems .....                | 367        |
| a.         | The State Space $\mathcal{X} = X_1^B \times X$ .....             | 369        |
| b.         | The State Space $\mathcal{X} = X \times X$ .....                 | 372        |
| c.         | The State Space $\mathcal{X} = X_1^C \times X$ .....             | 374        |
|            | Notes .....  | 383        |
| 4.         | Semigroups for Ordinary Differential Operators .....             | 384        |
|            | <i>M. Campiti, G. Metafunne, D. Pallara, and S. Romanelli</i>    |            |
| a.         | Nondegenerate Operators on $\mathbb{R}$ and $\mathbb{R}_+$ ..... | 385        |
| b.         | Nondegenerate Operators on Bounded Intervals .....               | 389        |
| c.         | Degenerate Operators .....                                       | 391        |
| d.         | Analyticity of Degenerate Semigroups .....                       | 401        |
|            | Notes .....  | 404        |
| 5.         | Semigroups for Partial Differential Operators .....              | 405        |
|            | <i>Abdelaziz Rhandi</i>  |            |
| a.         | Notation and Preliminary Results .....                           | 406        |
| b.         | Elliptic Differential Operators with Constant Coefficients ..... | 409        |
| c.         | Elliptic Differential Operators with Variable Coefficients ..... | 412        |
|            | Notes .....  | 420        |
| 6.         | Semigroups for Delay Differential Equations .....                | 420        |
| a.         | Well-Posedness of Abstract Delay Differential Equations .....    | 421        |
| b.         | Regularity and Asymptotics .....                                 | 425        |
| c.         | Positivity for Delay Differential Equations .....                | 429        |
|            | Notes .....  | 436        |
| 7.         | Semigroups for Volterra Equations .....                          | 436        |
| a.         | Mild and Classical Solutions .....                               | 437        |
| b.         | Optimal Regularity .....   | 443        |
| c.         | Integro-Differential Equations .....                             | 448        |
|            | Notes .....  | 453        |

|  |            |
|--|------------|
| 8. Semigroups for Control Theory .....                             | 453        |
| a. Controllability .....   | 457        |
| b. Observability .....   | 467        |
| c. Stabilizability and Detectability .....                         | 469        |
| d. Transfer Functions and Stability .....                          | 474        |
| Notes .....  | 477        |
| 9. Semigroups for Nonautonomous Cauchy Problems .....              | 478        |
| <i>Roland Schnaubelt</i>   |            |
| a. Cauchy Problems and Evolution Families .....                    | 478        |
| b. Evolution Semigroups .....                                      | 482        |
| c. Perturbation Theory .....                                       | 488        |
| d. Hyperbolic Evolution Families in the Parabolic Case .....       | 493        |
| Notes .....  | 497        |
| <b>VII. A Brief History of the Exponential Function .....</b>      | <b>498</b> |
| <i>Tanja Hahn and Carla Perazzoli</i>                              |            |
| 1. A Bird's-Eye View .....   | 498        |
| 2. The Functional Equation .....                                   | 501        |
| 3. The Differential Equation .....                                 | 503        |
| 4. The Birth of Semigroup Theory .....                             | 507        |
| <b>Appendix</b>  |            |
| A. A Reminder of Some Functional Analysis .....                    | 510        |
| B. A Reminder of Some Operator Theory .....                        | 516        |
| C. Vector-Valued Integration .....                                 | 523        |
| a. The Bochner Integral .....                                      | 523        |
| b. The Fourier Transform .....                                     | 527        |
| c. The Laplace Transform .....                                     | 531        |
