Contents

Preface	vii
Winding numbers for networks with weak angular data R. GHRIST	1
The snake charmer's algorithm E. RODRIGUEZ	19
Using a robot to learn geometric information from permutations of landmarks B. TOVAR, L. FRED A AND S. M. LAVALLE	33
Geometric descriptions of polygon and chain spaces J.-CL. HAUSMANN	47
Diffusion over tensor fields via Lie group PDE flows: Lagrangian action approach Y. GUR AND N. SOCHEN	59
Topological complexity of collision free motion planning algorithms in the presence of multiple moving obstacles M. FARBER, M. GRANT AND S. YUZVINSKY	75
Symmetric Motion Planning M. FARBER AND M. GRANT	85
Topological complexity of formal spaces L. LECHUGA AND A. MURILLO	105
Topological complexity of generic hyperplane complements S. YUZVINSKY	115
Homotopy Meaningful Hybrid Model Structures A. D. AMES	121
Presentations for the cohomology rings of tree braid groups D. FARLEY	145
Competitive Disconnection Detection in On-Line Mobile Robot Navigation Y. GABRIELY AND E. RIMON	173
