Contents

Preface	xi
Chapter 1. Geodesy – measuring the earth	1
1. The shape of the earth	1
2. The size of the earth	2
3. Latitude	4
4. Longitude and time	6
5. Determining longitude – two problems	6
6. A word on coordinates	8
7. Exercises	9
Chapter 2. Map projections	11
1. Three classes of projections	11
2. Map attributes	13
3. Attributes and map use	14
4. Map projections <i>vs.</i> mappaemundi	15
Chapter 3. Scale factors	17
1. Indicating map scale factors	17
2. Mathematics of scale factors	18
3. Exercises	21
Chapter 4. Distances and shortest paths on the sphere	23
1. Great circles	23
2. The sphere <i>vs.</i> Euclid	24
3. A proof using vector calculus	25
4. Computing distances	26
5. Exercises	27
Chapter 5. Angles, triangles, and area on a sphere	29
1. Measuring angles on a sphere	29
2. Spherical triangles	30
3. There are no ideal maps	31
4. A geometric proof of the spherical triangle area formula	32
5. Exercises	33
Chapter 6. Curvature of surfaces	35
1. No ideal maps, revisited	35
2. Gaussian curvature	36
3. Quantifying curvature	38
4. Exercises	40

Chapter 7. Classical projections	41
1. Classical azimuthal projections	41
2. The equirectangular projection	45
3. Ptolemy's projections	45
4. Globular projections	46
5. Exercises	47
Chapter 8. Equal-area maps	49
1. Computing areas	49
2. Lambert's equal-area maps	50
3. The Gall-Peters map	53
4. Pseudocylindrical projections	54
5. Exercises	58
Chapter 9. Conformal maps	61
1. The stereographic projection	62
2. Mercator's map	62
3. Exercises	66
Chapter 10. Analysis of map distortion	69
1. Length distortion	69
2. Area distortion	70
3. Angle distortion	73
4. Tissot's Indicatrix	75
5. Exercises	77
Chapter 11. Oblique perspectives	79
1. Changing the coordinate framework	79
2. The transverse Mercator map	83
3. Exercises	84
Chapter 12. Other worlds: Maps of surfaces of revolution	87
1. Surfaces of revolution	87
2. Cartographic projections of S_f	87
3. Scale factors	88
4. Conformal mappings	89
5. Examples	91
6. Equal-area maps	95
7. Distortion analysis	95
Appendix A. Aspects of thematic cartography: Symbolization, data classification, and thematic maps	97
1. Map classification	97
2. Map symbolization	98
3. Data classification	99
4. Types of thematic maps	101
Appendix B. Laboratory Projects	107
1. Project: Historical geodesy	107
2. Project: Curvature of surfaces	109
3. Project: World map design	110

4. Project: Navigation	113
Appendix C. Portraits of the earth: How the maps in this book were produced	115
1. The Maptools package	115
2. Multi-component displays	116
Bibliography	119
Index	121
